

390.5.a.	If that Ability affects a Game Object , the Delayed Linked Ability's window will be as long as that Game Object is in an appropriate zone.
390.5.b.	If the Delayed Linked Ability references the source of the abilities, its window will be as long as the source is in an appropriate zone.
390.5.c.	The appropriate zones for these Delayed Linked Abilities will be determined implicitly by the Linked Ability that generated them.
390.5.c.1.	If the Linked Ability causes the affected Game Objects to change zone to a non-board zone, the appropriate zone for the Delayed Linked Ability will be the zone the Game Object is moved to.
390.5.c.2.	Otherwise, the appropriate zone is whatever zone the Linked Ability triggered or was played from, or whatever zone the affected Game Object is located in when it is affected.
391.	Delayed Abilities will resolve or be active just like the ability they augment, but only during the specified time in the effect that created the Delayed Ability. <i>Example:</i> Ravenborn Tome reads "The next spell you play this turn deals 1 Bonus Damage." This is a Delayed Passive Ability that passively adds 1 Bonus Damage to just the next spell played. The next spell is a specific time, and the 1 Bonus Damage is a passive ability. <i>Example:</i> Noxian Guillotine reads "Choose a unit. Kill it the next time it takes damage this turn." When the chosen unit takes damage is the specified time, and killing it is the condition for a Delayed Triggered Ability.
392.	Delayed Abilities are not associated with Units or Gear ; they are created by other Abilities or Spells . As such they are executed when their condition and/or specified time occurs regardless of whether the source of the Delayed Ability is still on the board or not.
393.	Linked Abilities
394.	Linked Abilities are a set of Abilities with one or more of the component Abilities referencing the other Abilities in the set.
394.1.	Component Abilities can reference other Abilities in the set by means of referencing those Abilities directly or by referencing Game Objects affected by or mentioned in another Ability in the set.
395.	In order for a set of Abilities to be Linked, they must be present in the printed Effect or Rules Text of the same Game Object, or be granted by the same source to another Game Object. <i>Example:</i> The Zero Drive is an Equipment gear whose rules text reads in part "[3][B], Banish this: Play all units banished with this, ignoring their costs." The Zero Drive's effect text reads "[Deathknell][>] Banish me." The granted deathknell ability is linked with the Zero Drive's activated ability.
396.	Linked Abilities can contain component Abilities of any type.
397.	A component Linked Ability that references a Game Object affected by another Ability in the set may only interact with Game Objects affected by the Abilities it is Linked with. <i>Example:</i> The Zero Drive is an Equipment gear whose rules text reads in part "[3][B], Banish this: Play all units banished with this, ignoring their costs." Any units banished by effects other than component Linked Abilities in the same set as the activated ability cannot be played when resolving the activated ability.
398.	Playing or Activating Abilities
399.	Playing or activating Abilities follows the same steps of playing cards.
400.	Abilities when added to the Chain become Pending Items until they complete the steps of Playing .
400.1.	When an Ability finishes the steps of playing it becomes a Finalized Chain Item just like a Spell .

400.2.	When an Ability with the [Add] action is finalized it resolves immediately, like a Unit or Gear .
401.	1. Activate or trigger the Ability
401.1.	Add a Pending Item to the chain representing the Ability that is either being Activated or Triggered. Notably, although this Chain Item will not have a card representing it, this will create a Closed State . <i>See rule 349. Playing Cards for more information.</i>
401.2.	If there is currently a game effect being resolved, continue resolving the game effect instead of continuing the following steps.
402.	2. Make relevant choices
402.1.	If the first part of a Triggered Ability's effect is "you may," or "they may," its controller decides whether or not to perform the Triggered Ability now.
402.1.a.	If they choose not to perform the Triggered Ability now, it is removed from the chain.
402.2.	Make all choices required for this ability, such as targets, modes, or other relevant decisions. <i>See rule 349. Playing Cards for more information</i>
402.3.	If legal options are not available for an Activated Ability , it is not legal to activate it.
402.4.	If there are not enough options to make legal choices for a Triggered Ability that has been put on the chain, remove it from the Chain now. It ceases to be a Pending Item but never becomes a Finalized Chain Item .
402.4.a.	This is not an Ability being countered.
402.4.b.	If there are legal options to choose, the ability's controller must choose them. They may not decline this stage of playing a Trigger .
403.	3. Determine Total Cost
403.1.	Determine the base cost of the Ability .
403.1.a.	Activated Abilities will have a cost listed before the ":" in their text.
403.1.b.	Triggered Abilities will typically not have a base cost associated with them when placed on the chain due to their conditions.
403.1.b.1.	If a Triggered Ability has a cost within instructions (e.g. "[do X] to [do Y]"), the cost is taken as the base cost. <i>See rule 740.2.a. for more information on costs within instructions.</i>
403.2.	Apply cost increases and decreases as a result of choices made in the prior step. <i>See rule 349. Playing Cards for more information.</i>
403.3.	Apply any other cost increases or decreases as necessary. <i>See rule 349. Playing Cards for more information.</i>
404.	4. Pay Costs
404.1.	Pay costs as determined in the prior step. <i>See rule 349. Playing Cards for more information.</i>
404.2.	At this stage, players may decline to pay for Triggered Abilities that have incurred a cost. If they do, the ability will cease being a Pending Item and be removed from the Chain. It never becomes a Finalized Chain Item .
404.2.a.	This is not an Ability being countered.

405.	5. Check Legality
405.1.	Ensure that the Ability's targets are still legal.
405.2.	Ensure that the Ability's effect would not create an illegal state. If it would, resolve in the same way you would resolve a Card that creates an illegal state. <i>See rule 349. Playing Cards for more information.</i>
406.	6. Proceed with Play
406.1.	This Ability is no longer Pending .
406.2.	This Ability becomes a Finalized Chain Item .
406.3.	If there are other Pending Chain Items on the Chain, their controllers perform the remaining steps of playing now.
406.4.	Other players have an opportunity to play Reactions before the resolution of spells and abilities. <i>See rule 327. Chains for more information.</i>
406.5.	Otherwise, execute the Ability just like a Spell , then clear the Chain Item from the Chain.
407.	Game Actions
408.	Game Actions are actions players may perform at any given time during the game.
409.	A player, unless otherwise specified or prompted, may only perform actions on their turn.
410.	There are two types of Game Actions :
410.1.	Discretionary Actions
410.1.a.	A Discretionary Action is a Game Action that may be performed at any time during a player's turn during a Neutral Open State . <i>See rule 307. States of the Turn for more information.</i>
410.1.b.	A player may take any number of Discretionary Actions available to them during their turn.
410.1.b.1.	As long as any conditions, if applicable, are met.
410.1.b.2.	As long as any costs, if applicable, are paid.
410.1.b.3.	As long as it does not result in any forbidden action being taken or game state being created. <i>Example: A player can't use the Standard Move discretionary action to move a unit to a Battlefield that's already occupied by Units controlled by two other players.</i>
410.2.	Limited Actions
410.2.a.	A Limited Action is a game action that a spell, ability, or circumstance of the turn's progression causes the player to perform. A player cannot perform these actions at-will.
410.2.b.	These actions can only be taken when a player is instructed to do so as the execution of an effect or during their specified occasion during the turn. <i>Example: A player may Draw during the Draw Phase on their turn or when instructed to do so by a spell or ability. They can't choose to Draw at any other time.</i>
411.	Responsibility
411.1.	Game Actions may be the responsibility of up to one player. The player that performs the Game

	Action is responsible for it. <i>Example: Cull the Weak is a spell that reads "Each player kills one of their units." When the spell resolves, each player chooses a unit they control and kills that unit. They are responsible for the death of their own unit.</i>
411.2.	In the case where a Game Action is performed by procedures of the game and not by any player, that Game Action is not the responsibility of any player.
411.3.	Certain rules assign responsibility to players for Game Actions that they are not normally responsible for.
411.4.	If an ability triggers when "you" do something, it triggers when a Game Action that you are responsible for occurs. <i>Example: A gear reads "When you move an enemy unit, you may exhaust this to [Stun] it." It will trigger whenever a move game action that you are responsible for causes an enemy unit to move. If an opponent plays a spell that reads "choose a Battlefield. Each player may move a unit they don't control to that battlefield," and a player that controls the gear chooses to move an enemy unit, their gear will trigger.</i>
411.5.	Note that certain Game Actions , specifically Kill, can be attributed to spells and abilities. This attribution is not the same as the responsibility a given player has for the kill game action.
411.5.a.	Spells and abilities have attribution for game actions, while players have responsibility.
411.6.	Some Game Effects may check if a player has performed a Game Action "with" a Game Object . In order to do so, the Game Action must be attributed to the spell or ability of that Game Object if necessary, the player must control that spell or the ability of that Game Object , and the player must be responsible for the Game Action .
411.6.a.	Abilities granted via the effect text of a Game Object to another Game Object count for both Game Objects for this purpose.
412.	Types of Actions
413.	Draw
413.1.	Drawing a card takes a single card from a zone and adds it to the player's Hand .
413.1.a.	Unless specified otherwise, drawing takes cards from the top of the Main Deck .
413.2.	This is a Limited Action .
413.2.a.	Each player draws 1 during the Draw Phase on their turn.
413.2.b.	The player may draw cards when instructed to do so by other game effects.
413.3.	This action, when instructed, is formatted as "Draw X."
413.4.	If a player attempts to draw more cards than are available in their Main Deck , they do the following:
413.4.a.	Draw as many as possible.
413.4.b.	Perform a Burn Out. <i>See rule 431. Burn Out for more information.</i>
413.4.c.	Draw the remaining cards needed to complete the Draw action.
414.	Exhaust
414.1.	Exhausting is an action that marks a non-spell Game Object on the board as "spent."

414.1.a.	To mark it, rotate the card 90 degrees opposite of Readying , so that the orientation of the card is lengthwise in front of you.
414.1.b.	A Game Object that is already Exhausted cannot be Exhausted again.
414.1.c.	If a Game Object is instructed to be Exhausted while it is already Exhausted , nothing additional happens.
414.2.	"Exhausted" is a state for Game Objects on the board that other game effects and rules can reference.
414.3.	This is a Limited Action .
414.3.a.	Most Exhaust actions will be costs for Activated Abilities or Discretionary Actions . <i>Example:</i> A unit's Standard Move exhausts the unit as a cost.
414.4.	When Exhausting is listed as a Cost , then the Action must be able to be completed for the cost to be paid. <i>Example:</i> A spell says "As an additional cost to play this, you may exhaust a friendly unit." An exhausted friendly unit may not be exhausted again as the additional cost for the spell, and the additional cost has not been paid.
414.5.	In abilities, the Exhaust symbol represents the cost "Exhaust this" or "Exhaust me." It resembles a card turning sideways.
415.	Ready
415.1.	Readying is an action that marks a non-spell Game Object on the board as available for action.
415.1.a.	To mark it, rotate the card 90 degrees opposite of Exhausting , so that it is vertically oriented in front of you.
415.1.b.	A Unit that is already Ready cannot be Readied again.
415.1.c.	If a Unit is instructed to be Readied while it is already Ready , nothing additional happens.
415.2.	"Ready" is a state for Game Objects on the board that other game effects and rules can reference.
415.3.	This is a Limited Action .
415.3.a.	A player Readies all non-spell Game Objects they Control during the Awakening Phase on their turn.
415.3.b.	Players may also Ready Game Objects on the board when effects or spells instruct them to do so.
416.	Recycle
416.1.	Recycling cards is the action in which a player takes one or more cards from a specific zone and then puts it on the bottom of the corresponding deck.
416.1.a.	Main Deck cards are Recycled to the Main Deck .
416.1.b.	Runes are Recycled to the Rune Deck .
416.1.c.	Each player Recycles cards to their own Main Deck and Rune Deck , regardless of which player is instructed to perform the Recycle action.
416.2.	This is a Limited Action .
416.2.a.	The player must Recycle cards from the specified zones when instructed to do so by game effects or costs.

416.3.	When Recycling is listed as a Cost, the action must be able to be completed for the cost to be paid. <i>Example:</i> Vi, Destructive has the ability "Recycle 1 from your trash: Give me +1 [M] this turn." Each time a player activates the ability, they must recycle 1 card from their trash to pay its cost. If they have no cards in their trash, they can't activate the ability, because they can't pay its cost.
416.4.	When Recycling is part of an effect, a player must Recycle as many cards as possible from the specified zone or zones.
416.5.	If 2 or more cards are Recycled to the Main Deck simultaneously, they are placed on the bottom of that deck in a random order. <i>Example:</i> Garbage Grabber has the ability "Recycle 3 from your trash, [1], [E]: Draw " To pay the cost of activating this ability, its controller chooses 3 cards from their trash and places them on the bottom of their Main Deck in a random order.
416.5.a.	If 2 or more cards are Recycled to the Rune Deck simultaneously, they are placed on the bottom of that deck in the order of their owner's choosing.
416.6.	This action, when instructed, is sometimes formatted as "Recycle X from [Zone]." That means to take X cards of the instructed player's choice from the relevant zone and recycle them. Such an instruction does not target the recycled cards. <i>Example:</i> Dr. Mundo, Expert has the ability "At the start of your Beginning Phase, recycle 3 from your trash." As that ability resolves, its controller recycles 3 cards from their trash. If there are fewer than 3 cards in that player's trash, they recycle as many as they can.
417.	Deal
417.1.	Spells, Units, Abilities, and other game effects may Deal Damage to units.
417.1.a.	Assigning Damage during the Combat Damage Step is not Dealing Damage, but will cause Damage to be Dealt when assignment is complete.
417.1.b.	To Deal Damage to Units, mark the specified amount of Damage on the Unit.
417.1.c.	Damage is marked on each unit separately.
417.1.d.	Damage can be Dealt to more than one Unit at the same time.
417.1.e.	Valid Damage is a positive integer amount, greater than or equal to 1 Damage.
417.1.e.1.	Only Valid Damage is Dealt. <i>Example:</i> A unit reads "when I take damage, give me +2 [M] this turn." A spell is played that Prevents the next 3 damage the unit would take. If a player plays Hextech Ray targeting the unit, it will take no damage and its triggered ability will not trigger. If that player had played Void Seeker instead, it would be Dealt 1 and trigger its ability.
417.2.	Only Damage can be Dealt.
417.3.	Dealing Damage is a Limited Action.
417.3.a.	Assigning Damage causes Damage to be dealt outside of being directed to Deal Damage. <i>See rule 459. Combat for more information.</i>
417.4.	Dealing can have the intrinsic property of Bonus Damage.
417.5.	Bonus Damage is a property granted to the action of Dealing and alters the amount of Damage distributed by this action. <i>See rule 712. Bonus Damage for more information.</i>
417.6.	Deal actions can originate from one or more sources.

417.6.a.	If a game effect does not specify a source, the game effect describing the Deal action is the source. <i>Example:</i> Void Seeker is a spell that reads “Deal 4 to a unit at a battlefield. Draw 1.” The damage that Void Seeker instructs you to deal is dealt by Void Seeker.
417.6.b.	If a game effect does specify a source, then that source is what is considered the origin of the Damage for this Deal action.
417.6.b.1.	Units and Spells can be the source of Damage for Deal actions.
417.6.b.2.	Abilities can be the source of Damage for Deal actions.
417.6.b.2.a.	When an Ability is the source of Damage for a Deal action, it is in addition to the Spell or Unit that created that Ability. <i>Example:</i> Iron Ballista is a gear that says “[E]: Deal 2 to a unit at a battlefield.” This damage is dealt both by a gear and by an ability.
417.6.b.3.	When a spell or ability specifies a Unit as the source of the Damage for the Deal action, it is not in addition to the spell or ability that instructed it. <i>Example:</i> Challenge is a spell that reads “Choose a friendly unit and an enemy unit. They deal damage equal to their Might to each other.” The damage that Challenge causes to be dealt is dealt by the chosen units, not by Challenge.
417.6.b.4.	The controller of the source of a Deal action is responsible for that Deal action unless the player performing the Deal action is otherwise specified. <i>Example:</i> If a player plays Challenge targeting a friendly unit and an enemy unit, the controller of the enemy unit is responsible for the damage dealt by their unit. Any effects that trigger “when you deal damage” that that player controls will trigger.
417.6.c.	Damage Dealt as a result of being assigned during Combat has the Units as its source.
417.6.c.1.	The Damage assigned, and subsequently Dealt, to attackers has the defenders as the source and vice versa.
417.7.	Deal actions can distribute Damage as part of combat actions or non-combat actions.
418.	Heal
418.1.	Damage being cleared from Units is Healing.
418.1.a.	If Damage is cleared for any reason it is considered Healing.
418.2.	More than one Unit can be Healed at the same time.
418.3.	Healing is a Limited Action.
418.3.a.	Players may only Heal units when game effects instruct them to, or at specific points in the turn.
419.	Play
419.1.	A player Plays cards by placing them on the chain and queuing them to be finalized. See rule 349. Playing Cards for more information on playing cards. See rule 337. Finalize for more information on finalizing cards.
419.1.a.	By default, a player can only Play cards from their hand or their Chosen Champion zone.
419.2.	This is a Discretionary Action.
419.2.a.	As long as a player has the resources to pay the costs associated with the card and legal

	choices to make for their cards, they may Play cards.
419.3.	Game effects may result in cards being played as part of their resolution.
419.3.a.	This treats Play as a Limited Action .
419.3.b.	Treat all steps of Play as normal, except as noted by the game effect creating this Limited Play Effect .
419.3.c.	If there are no eligible cards to Play when instructed to Play in this manner, then nothing happens and resolution continues.
419.4.	Some Abilities trigger when cards are played or otherwise check whether cards have been played.
419.4.a.	Any such triggered abilities trigger when the act of playing the card has been <i>completed</i> by the resolution of the card.
419.4.a.1.	If a game effect prevents the resolution of the card—for example, because the card was countered —abilities that trigger on playing cards will not trigger. <i>See rule 425. Counter for more information.</i>
419.4.b.	Non-triggered abilities that check cards being played do so by means of referencing whether said cards have been Finalized . <i>Example:</i> A player plays a spell, which is countered by Defy. Any Legion abilities of game objects controlled by that same player will be active. <i>Example:</i> A player plays a spell, which is countered by Defy. If that player plays Battering Ram and has played no other cards that turn, it will cost [4] Energy.
420.	Move
420.1.	Moving is the act of a Game Object moving between two Locations on The Board . <i>See rule 445. Movement for more information on movement.</i>
420.2.	Moving is a Limited Action .
420.2.a.	Players may only move Game Objects when instructed to do so by Game Effects or costs.
420.2.b.	The Standard Move inherent to Units may also cause Movement . <i>See rule 144. for more information on the Standard Move.</i>
420.3.	The Standard Move inherent to Units is a Discretionary Action .
420.3.a.	The Cost is Exhausting one or more Units .
420.3.b.	The Effect is Moving those Units .
421.	Hide
421.1.	Hiding a card is the act of placing a card facedown at a Battlefield you control.
421.2.	Hiding is a Discretionary Action .
421.2.a.	The Hidden keyword allows a player to pay a cost to Hide a card any time they have a Hidden card in their hand or Champion Zone and meet the prerequisites. <i>See rule 811. Hidden for more information.</i>
421.3.	Cards that are facedown at Battlefields have their gameplay properties and permissions defined by the effect that put them there. <i>Example:</i> Cards that players Hide with the Hidden keyword can be Played for [0] on any subsequent turn as a property of the Hidden keyword.

421.4.	If a facedown card would change zones or if the game ends, its owner reveals it to all players. <i>See rule 128. Privacy for more information.</i>
422.	Discard
422.1.	Discarding a card is moving it from a player's hand directly into their trash without activating or executing its normal rules text.
422.1.a.	The player who is performing the action chooses which cards to send to their Trash , and may use Private Information to do so.
422.1.b.	"When I am discarded" abilities or other Triggered Abilities that trigger on discarding are executed after discarding has occurred.
422.2.	Discarding is a Limited Action .
422.2.a.	A player must Discard cards when instructed to do so by game effects or costs.
422.3.	When Discarding is listed as a Cost , then the Action must be able to be completed for the cost to be paid. <i>Example:</i> A card has the ability "Discard 2: Deal 2 damage to a unit at a battlefield." To activate the ability, the card's controller must have at least 2 cards in hand and must be able to discard them.
422.4.	When Discarding is part of an effect, then a player must Discard as many cards as possible from their hand. If instructed to discard more cards than they have in their hand, further discard instructions are ignored. <i>Example:</i> Undercover Agent has the ability "[Deathknel][>] Discard 2, then draw 2. (When I die, get the effect.)" If Undercover Agent's controller has 2 or more cards in hand, they must discard 2. If they have 1 card in hand, they discard 1, and the rest of the discard instruction is ignored. If they have no cards in hand, the entire discard instruction is ignored. Regardless of how many cards they discard, they then draw 2.
422.5.	This action is formatted as "Discard X."
423.	Stun
423.1.	Stunning is the act of selecting one or more Units on the Board and rendering them Stunned .
423.1.a.	Stunned is a binary state. A Unit is Stunned or it isn't.
423.1.a.1.	A Stunned Unit can not be Stunned again. <i>Example:</i> Eclipse Herald has the ability "When you stun an enemy unit, ready me and give me +1 [M] this turn." Its controller plays a spell that reads "Stun a unit." They may choose a unit that's already stunned, but if they do, Eclipse Herald will not trigger.
423.1.a.2.	Stunned Units lose the Stunned status during step 3d of the end of turn cleanup.
423.1.b.	A Stunned Unit does not contribute its might to damage in the combat damage step. <i>See rule 465. The Combat Damage Step for more information.</i>
423.1.c.	A Stunned Unit must still have damage applied to it equal to, or greater than, its full might value to be killed.
423.2.	Stunning is a Limited Action .
423.2.a.	Players may only Stun Units when directed to by Game Effects .
424.	Reveal
424.1.	Revealing is the act of presenting a card to <i>all players</i> from a zone that one or more players do not

	have access to the information of.
424.1.a.	Revealed is a temporary state and is not a zone.
424.1.a.1.	Other cards, including the card being revealed, can reference the act of <i>being Revealed</i> .
424.1.a.2.	Cards remain in the zone they are being Revealed from. <i>Example:</i> If a card is being Revealed from the top of a player's Main Deck , it is still the top card of that player's Main Deck .
424.1.a.3.	The state of being Revealed lasts for the duration specified by the game effect that applied the state; if there is no duration specified and the state was caused by a Reveal action as instructed by a spell or ability, it lasts until the resolution of that spell or ability finishes.
424.1.b.	Unless otherwise described, Revealed cards do nothing else beyond become temporarily known information to <i>all players</i> .
424.2.	Revealing is a Limited Action .
424.2.a.	Players may only Reveal cards from Private or Secret zones when instructed to do so by Game Effects .
424.2.b.	During the course of a game of Riftbound , a player may choose to show Private information to one or more other players. This does not count as revealing and does not trigger any effects that trigger when cards are revealed.
424.3.	This action is formatted as "Reveal cards from [zone]." or "Reveal [Zone]." <i>Example:</i> "Reveal 2 cards from the top of your Main Deck" would be executed by taking the two cards from the top of your Main Deck, and then presenting them to all players to clearly read and understand at the table. Then, when all players have had a chance to understand the revealed information, return them to the top of the Main Deck in the same order.
424.3.a.	When the zone is instructed to be Revealed without indicating a number of cards, that refers to "All cards currently in the specified zone." <i>Example:</i> A card reads "Choose an opponent and reveal your hand. That player picks a card in your hand. You may play the rest this turn, ignoring their costs." When instructed to reveal their hand, that player reveals the cards currently in their hand.
424.3.a.1.	The Revealed state is applied to those cards. Any further cards added to that zone after the instruction has been executed do not become Revealed .
424.4.	Game Effects can manipulate or modify the cards Revealed while they are Revealed
424.4.a.	While cards are Revealed , those cards can be further manipulated, or accessed. They can even have their destination modified for when the Reveal ends. <i>Example:</i> "Reveal 2 cards from the top of your Main Deck. Put one into your hand and Recycle the other" would be executed by taking the top two cards from your Main Deck, presenting them to the table, and once every player present has had a chance to understand them you would make the selection of one of them to add to your hand. The one you did not select would then be Recycled to the bottom of the Main Deck .
425.	Counter
425.1.	Countering is the act of negating the execution, activation, or otherwise playing of a card or ability by a player.
425.1.a.	A card or ability that is Countered does nothing and is cleared from the chain.

425.1.a.1.	Cards that are cleared from the chain in this way are placed in the trash.
425.1.b.	A card that is Countered is not considered to have been played for abilities that trigger on cards being played.
425.1.c.	Countering does not refund any costs paid to play a card, activate an ability, or trigger an ability.
425.1.c.1.	This includes additional costs.
425.2.	Countering is a Limited Action .
425.2.a.	Players may only Counter cards and abilities when directed to by Game Effects .
425.3.	This action is formatted as " Counter [a card or ability on the chain]."
426.	Buff
426.1.	Buffing is the action of placing a Buff counter on a Unit . <i>See rule 701. Buffs for more information.</i>
426.1.a.	A Buff is also an object.
426.1.b.	To Buff a unit, place a Buff Counter on it if it does not have one already
426.1.b.1.	If the unit already has a Buff Counter on it, it does not get another one.
426.1.b.2.	Some effects may grant a Game Object permission to be Buffered multiple times. Such an effect ignores this restriction.
426.1.c.	Units with Buff Counters can still be chosen for actions that Buff units, but will <i>not</i> be Buffered as part of the execution. <i>Example:</i> A spell reads "Buff a unit. Then, if it was buffed this way, draw a card." It will place a buff counter on a unit that has no buff counter, and then its controller will draw a card. However, if the player chooses a unit with a buff counter on it already, then the card will not be drawn. <i>Example:</i> A unit reads "When you buff me, ready me." If that unit is chosen for a game effect that would buff it and it is already buffed, its ability will not trigger.
426.2.	Buffing is a Limited Action .
426.2.a.	Players may only Buff units when Game Effects direct them to do so.
426.3.	This action is formatted as " Buff [one or more units]." e.g., "Buff a unit." e.g., "Buff a friendly unit." e.g., "Buff two friendly units at the same battlefield."
427.	Banish
427.1.	Banishing is the action of placing a card from any other zone into Banishment . <i>See 108.6. Banishment for more information.</i>
427.2.	When a card is Banished it is placed directly into the Banishment zone from its origin.
427.2.a.	Banish is not a subset of Kill .
427.2.b.	Banish is not a subset of Discard .
427.3.	Cards and effects can refer to cards that were banished <i>by the same object</i> .

427.3.a.	Separate instances of an object or effect banishing cards do not reference other banished cards by objects of the same name or effects originating from cards of the same name. <i>Example:</i> A spell reads "Banish the top card of your Main Deck. When you conquer this turn, draw it." This card effect allows you to draw the banished card from banishment if a condition is met. If more than one of these effects is played, each one triggers separately. Each card will be drawn separately. If the turn player passes the turn without playing the card, the card remains in banishment indefinitely. If the same player plays another copy of the same spell, banishes another card, and satisfies its condition, they could play the new banished card, but not the original banished card. See rule 393. Linked Abilities for more information.
427.4.	Banishing is a Limited Action .
427.4.a.	Players may only Banish cards or permanents when Game Effects direct them to do so.
427.5.	This action is formatted as "Banish [one or more permanents or cards]." e.g., "Banish a card from your hand." e.g., "Banish 2 cards from your trash." e.g., "Look at the top 2 cards of your Main Deck. Draw one of them and banish the other."
428.	Kill
428.1.	Killing is the action of a Permanent going to the trash from the board.
428.1.a.	This can be Active or Passive .
428.1.a.1.	Active Kill is when the action is taken when instructed by a game effect or as a cost for a card or ability.
428.1.a.1.a.	This is referred to as a Kill Instruction .
428.1.a.1.b.	When a unit with a Deathknell or other ability that triggers on its own death is to be put in the Trash due to a Kill Instruction, it first has any such ability added to the chain as a Pending Item. Note the unit's location, attributes, and other relevant information to process those abilities when finalized before completing this Kill Instruction. <i>Example:</i> Draven, Audacious reads in part "When I die in combat, choose an opponent. They gain 1 point." The ability triggers when Draven himself dies, so it will go on the chain first when a kill instruction is performed on Draven, before he is put in the trash.
428.1.a.2.	Passive Kill is when the action is taken as a result of Lethal Damage or as a consequence for any other state.
428.2.	When a permanent is killed it is placed directly in the trash from its place of origin.
428.2.a.	It is only considered Killed if its origin was any zone on the board.
428.2.b.	This is not a subset of Move .
428.3.	Killing is a Limited Action .
428.3.a.	Players may only Kill units when Game Effects direct them to do so.
428.4.	Killing can also be the result of resolving a Cleanup .
428.5.	Killing can be attributed to one or more Game Objects .
428.5.a.	The Killed Unit or Gear is said to be Killed by that Game Object .
428.5.b.	A spell or ability that contains a Kill instruction is responsible for Killing the Unit or Gear .

428.5.c.	When one or more Units is killed due to a Cleanup , that kill action is attributed to the spell or ability that resolved immediately prior to that Cleanup that dealt damage to the Unit or Units .
428.5.c.1.	The player responsible for the deal action is responsible for the kill action.
428.5.c.2.	If the Cleanup that caused the units to be killed was the Combat Cleanup , the sources of the Combat Damage are attributed the kill action, and their controller is responsible for the kill action.
428.5.d.	Abilities originating from Game Objects that are attributed Kill Actions are attributed in addition to the Game Object that created them. <i>Example:</i> There is a spell that says "Do this twice: Deal 3 to a unit." Immortal Phoenix is a unit that says "When you kill a unit with a spell, you may pay [1][C] to play me from your trash." A player plays the spell while Immortal Phoenix is in their trash. The "do this" phrasing means that it has a reflexive triggered ability, which places two triggered abilities on the chain. As each of those triggered abilities resolve, it deals damage to the unit chosen for that ability. If one of these abilities deals lethal damage to a unit, both the spell and its ability are considered sources of the damage, and so both the spell and its ability receive attribution for killing the unit. This means that the spell's controller killed a unit with a spell, so Immortal Phoenix's ability will trigger.
428.6.	This action is formatted as "Kill [one or more permanents]." e.g., "Kill an enemy unit." e.g., "Kill this, [2]: Draw 1." e.g., "Kill all gear."
429.	Add
429.1.	Adding is the action of putting resources into a player's Rune Pool .
429.2.	Triggered and activated abilities that Add resources resolve as soon as they are finalized.
429.2.a.	Priority and Focus will not pass from Add abilities being finalized or resolving, and will resolve before any other outstanding items on the chain are finalized.
429.2.b.	Spells that Add resources will linger on the chain as normal when they are finalized.
429.3.	Activated abilities that Add resources and have the Reaction tag can be activated at any time that spells or abilities require resources be paid. <i>Example:</i> A player can add Energy and Power through any means before initiating the process of playing a spell. After initiating that process, in the Pay Costs step, they may activate Add Reactions to add Energy or Power to pay costs. <i>Example:</i> A player moves two units to a battlefield where their opponent controls a Mageseeker Investigator. Although they have no window of priority, they may activate Add Reactions to pay for the applied cost from Mageseeker Investigator, and those abilities finalize and resolve immediately.
429.3.a.	When an Add ability is activated in this way, it immediately finalizes and resolves, even during the resolution of spells and abilities.
429.4.	Adding is a Limited Action .
429.4.a.	Players may only Add resources when Game Effects direct them to do so.
429.5.	This action is formatted as "Add [one or more resources]." e.g., "Add [2]." means "Add 2 Energy." e.g., "[E]: Add [Y]." means "Add 1 Power of the Order domain." e.g., "Add [1][C]." means "Add 1 Energy and 1 Power of the Calm domain."

430.	Channel
430.1.	Channeling is the action of taking one or more Runes from the top of a player's Rune Deck and putting them on the board.
430.2.	The Game Effect that instructs a player to channel 1 or more runes may specify the conditions or circumstances under which those runes enter the board. <i>Example:</i> A spell reads "Channel 1 rune exhausted." As that spell resolves, its controller puts the top rune of their rune deck onto the board and that rune enters the board exhausted rather than ready.
430.2.a.	By default, runes are channeled readied.
430.3.	If there aren't sufficient runes in the Rune Deck , channel as many as possible.
430.4.	Channeling is a Limited Action .
430.4.a.	A player Channels two Runes during the Channel Phase on their turn.
430.4.b.	Players may also Channel runes when Game Effects direct them to do so.
430.5.	This action is formatted as "Channel X rune(s)," optionally followed by conditions or stipulations. e.g., "Channel 1 rune." e.g., "When you play me, channel 1 rune exhausted." e.g., "Channel 2 runes exhausted. If you couldn't channel 2 runes this way, draw 1."
431.	Burn Out
431.1.	Burning Out is an action a player must perform if they attempt to move one or more cards from their Main Deck to any other zone in excess of the number of cards remaining in their Main Deck :
431.1.a.	If a player must Draw cards in excess to the number of cards in their Main Deck, they will Draw as many as possible, perform this action, then Draw the remaining amount instructed.
431.1.b.	If a player must put one or more cards from their Main Deck in any other zone, such as the Trash , in excess of the number of cards in their deck they will do so as much as possible, perform this action, and then complete the remaining number required by the instruction.
431.1.c.	If an instruction directs a player to look at or reveal cards in excess to the number of cards in a player's Main Deck , that player looks at or Reveals as many as possible, but does not Burn Out , then proceeds with the rest of the instruction.
431.1.c.1.	If there are insufficient cards among the looked at or revealed cards to perform subsequent actions to the revealed or looked at cards, any further instructions are ignored. This does not cause a Burn Out , even if those instructions would cause those cards to change zones. <i>Reminder:</i> Cards are considered in the zone of origin while being looked at or revealed, in this case the Main Deck .
431.2.	To Burn Out , a player does the following in sequence:
431.2.a.	Performs as much of the prescribed action as possible.
431.2.b.	Recycles their trash into their Main Deck. <i>Reminder:</i> When multiple cards are Recycled to the Main Deck at the same time, those cards must be randomized
431.2.c.	Chooses an opponent to gain 1 point.
431.2.d.	Completes the remainder of the action that caused them to burn out. <i>Example:</i> A player attempts to draw 1 during their Draw Phase while their Main Deck is empty. That player instead recycles their trash into their Main Deck,

	randomizing it as normal, then chooses an opponent to gain 1 point, and then draws 1.
431.3.	A player's Main Deck may remain empty as they Burn Out , usually because their trash is also empty. When they attempt to perform the original action again, it will cause another Burn Out .
431.3.a.	Unless some effect intervenes, this will result in them burning out repeatedly, giving 1 point to an opponent each time, until an opponent passes the Victory Score and wins the game.
431.3.b.	Points gained after the first Burn Out being processed in sequence cannot be replaced or prevented by any means.
431.3.c.	Points gained after the first Burn Out being processed in sequence that cause a player to reach or surpass the Victory Score for their game mode will cause that player to win the game if they also have more points than any opponent. <i>Example:</i> If a player has no cards in their deck or their trash and they go to draw 1, they will begin to burn out repeatedly. After the first burn out is processed, any subsequent burnout that brings a player to a number of points greater than the Victory Score and more than any opponent will cause them to win the game.
431.3.c.1.	The player wins immediately, without needing to wait for a cleanup to occur.
431.4.	Burning Out is a Limited Action .
431.4.a.	Players may only burn out when Game Effects direct them to do so.
431.5.	Burning Out is a Replacement Effect . <i>See rule 367. Replacement Effects for more information.</i>
432.	Double
432.1.	Doubling is the act of increasing a numeric attribute by an amount equal to that attribute's current value.
432.1.a.	This creates an effect that modulates that attribute by that specific amount for the duration specified by the Game Effect that instructed the player to perform this action. <i>Example:</i> A unit with 3 base Might and Shield 2 is in combat as a Defender. Since Shield applies, its current Might is 5. A player chooses it as the target for Last Stand, a spell that reads in part "Double a friendly unit's Might this turn." Its current Might is 5, so it gets +5 Might this turn, for a current Might of 10. After combat, Shield no longer applies, but the +5 Might from Last Stand does, so the unit's Might is 8.
432.2.	Doubling is a Limited Action .
432.2.a.	Players may only Double when Game Effects direct them to do so.
433.	Swap
433.1.	Swapping is the act of increasing one numeric value and decreasing another numeric value on some number of Game Objects such that their values are reversed.
433.1.a.	Swapping creates two different effects that apply to each attribute. One that Increases one value and one that Decreases the other. These effects last for the duration specified by the effect that instructed the Swap .
433.1.b.	To accomplish this, determine the difference between these values and then apply an Increase for that amount to the lower value of the two attributes, and a Decrease of that amount to the higher value of the two attributes.
433.1.c.	If both attributes are the same numeric value, Swapping has no effect.

433.2.	Swapping is a Limited Action .
433.2.a.	Players may only swap when Game Effects direct them to do so.
434.	Attach
434.1.	Attaching is the act of linking two cards on the board together to combine their effects in some way. This causes one or more cards to become Attached and at least one card to become a Top-Most Card. <i>See rule 716. Attachment for more information.</i>
434.1.a.	Attaching affects two cards at once.
434.1.a.1.	One card will be designated as the one being Attached , and thus become Attached . The other will become the Top-Most Card .
434.1.b.	This is represented by physically laying the Top-Most card on top of the other or others such that all Effect Texts and Might Bonuses are showing, but nothing else from the card or cards Attached .
434.1.b.1.	In the situation where there is more than one card attached to the Top-Most card , they should be stacked in such a way that all Effect Text boxes and Might Bonuses are readable. The order of the Attached cards has no bearing on the application of effects.
434.1.c.	The Top-Most card has all Effect Text of all cards Attached to it appended to its Rules Text .
434.1.d.	The Top-Most Card has its Might modulated by the Might Bonus of all cards Attached to it.
434.1.e.	Attaching one or more cards will cause those cards' printed Rules Text to become Inactive for as long as they remain Attached. <i>See rule 716. Attachment for more information.</i>
434.1.f.	Attaching a card to a new Top-Most Card will cause it to Detach from the card to which it is currently Attached .
434.1.g.	Attaching a card to its current Top-Most Card will not have any effect.
434.1.h.	If a Game Effect instructs a player to Attach a card to its current Top-Most Card , nothing additional happens.
434.2.	Attaching is a Limited Action.
434.2.a.	Players may only Attach cards when directed to by Game Effects .
434.3.	Attaching cards does not inherently choose or specify a target. However, Game Effects that Attach cards may do so.
434.4.	When a card Attaches to a card, its location becomes the same as the new Top-Most Card .
434.4.a.	This is not a Move .
434.5.	Attaching a card to another card does not modify either card's state except in making those cards Attached and the Top-Most Card, and causing the Attached card to change locations. <i>Example: An exhausted equipment being attached to a unit does not ready the equipment.</i>
435.	Detach
435.1.	Detaching is the act of unlinking two cards that are currently linked through the act of Attaching. This causes one to cease being Attached, and potentially causes the other to cease being a Top-Most card.

435.1.a.	Detaching affects only cards that are currently Attached to another card.
435.1.a.1.	Game effects that instruct a player to Detach a card that is currently not Attached to anything will do nothing.
435.1.b.	When one or more cards become Detached , they cease to be in the Attached state.
435.1.b.1.	To represent this, these cards should no longer be placed under the card they were previously placed under as Top-Most Card .
435.1.b.2.	If the Top-Most Card no longer has any cards Attached to it after this, it is no longer a Top-Most Card .
435.1.c.	The card being Detached has its Effect Text become Inactive and its Rules Text cease being Inactive .
435.1.d.	The Top-Most Card ceases to have the Effect Text of the card being Detached appended to its Rules Text .
435.1.e.	The Top-Most Card ceases to have its Might modulated by the Might Bonus of the card being Detached .
435.2.	Detaching is a Limited Action .
435.2.a.	Players may only Detach cards when directed to by Game Effects .
435.3.	Detaching cards does not inherently choose, or specify a target. However, Game Effects that Detach cards may.
435.4.	When a card Detaches from a Top-Most Card , its location is the same as the Top-Most Card from which it Detached .
435.4.a.	If the Detached card was a Gear and this causes it to become present at a Battlefield , it will be Recalled during the next Cleanup . <i>See rule 318. Cleanups for more information.</i>
435.4.b.	If the Attached card was Detached because the Top-Most Card changed zones from a board zone to a non-board zone, then the location that the Attached Card will Detach to is the last location the Top-Most Card was at before changing from a board zone to a non-board zone.
436.	Predict
436.1.	Predicting a card is the act of looking at a single card from the top of the Main Deck and choosing whether or not to Recycle it.
436.1.a.	When more than one card is Predicted , the Predicting player looks at that many cards and Recycles any number of them before putting the rest back on top of their Main Deck in any order.
436.2.	Predicting is a Limited Action .
436.2.a.	Players may only Predict cards when instructed to do so by game effects.
436.3.	This action, when instructed, is formatted as "Predict X."
436.3.a.	If omitted, X is presumed to be 1.
436.4.	If a player attempts to Predict more cards than are available in their Main Deck , they will Predict as many as possible instead.
436.4.a.	The Player will not perform a Burn Out as a result of Predicting with too few cards in their

	deck.
437.	Prevent
437.1.	Preventing damage is the act of reducing the Damage a set of game objects would take.
437.1.a.	Prevent is an action that interacts with Damage .
437.1.a.1.	Prevent includes any applied Bonus Damage when determining the total damage being prevented.
437.1.b.	Prevent appears in statements that define an amount of damage and the source of the damage it will affect, as well as the timespan it will be relevant for.
437.1.b.1.	Prevent actions are usually formatted as “ Prevent the next X [source] damage that would be dealt to a [unit] this turn.”
437.1.b.1.a.	The X is referred to as the Prevent Value.
437.1.b.1.b.	X can be “All,” which specifies an infinite amount of damage.
437.1.b.2.	Prevent will always apply to the next damage that would be dealt to a unit affected by the Prevent action.
437.2.	When damage is Prevented , it is replaced with an event where it deals that much damage reduced by the Prevent Value tracked on the Unit specifically.
437.2.a.	The damage being dealt as a result of Preventing can never be less than 0, but can be 0. This is equivalent to not dealing damage.
437.3.	When damage is dealt this way, reduce the Prevent Value being tracked on the Unit affected by the Prevent action by the prevented amount.
437.3.a.	If the Prevent Value is 0 or less, then Prevent is no longer being tracked on the Unit in question, and the effect expires.
437.3.b.	The reduced value is the newly tracked Prevent Value.
437.3.c.	If the Prevent Value is “All” then it remains “All.”
437.4.	Damage dealt to a Unit that has that all of that damage Prevented is not considered to have been dealt to it at all.
437.5.	Damage can still be assigned to Units in combat that are affected by Prevent . The damage dealt as a result of that assignment will be affected by the Prevent action.
437.5.a.	Damage can be assigned to a Unit up to a value that would be Lethal considering the Prevent Value of all Prevent Actions on a Unit , following the normal rules for damage assignment. Example: A unit with 2 [M] is being assigned damage in the combat damage step. The unit has “prevent the first 3 damage I would take each combat.” The unit would need to be assigned 5 damage in order to have lethal damage assigned to it.
437.5.b.	No amount of damage is ever considered lethal if the Prevent Value is “All.”
437.6.	Prevent is a Limited Action .
437.6.a.	Players may only Prevent Damage when directed to by Game Effects .
437.7.	Prevent is a Delayed Replacement Effect . See rule 367. Replacement Effects for more information. See rule 389. Delayed Abilities for more information.

438.	Replace
438.1.	Replacing is the act of Creating a token in the place of another card or token without playing it while inheriting all effects or statuses of the game object it replaced.
438.1.a.	The replacing token is treated as the same Game Object as the card or token it replaced for the purposes of Game Effects that target or reference that game object. <i>Example:</i> A player with Green Father as their legend conquers Navori Fighting Pit. They choose to place the Green Father conquer effect on the chain after the Navori Fighting Pit conquer effect. When the Green Father trigger resolves, Navori Fighting Pit is replaced with Brush. Although the Navori Fighting Pit has been replaced, the “here” in its triggered ability still can have its information referenced, because the Brush inherited all statuses and conditions. The unit Navori Fighting Pit’s triggered ability has targeted will still be a legal target on resolution.
438.2.	Replacing is a Limited Action .
438.2.a.	The player may Replace cards and tokens when instructed to do so by other game effects.
438.3.	This action, when instructed, is formatted as "Replace [X] with [Y]."
438.3.a.	The [X] is the target to be Replaced .
438.3.b.	The [Y] is the object that will Replace the target.
438.3.b.1.	This will always specify a Token to create.
438.4.	Replacing is not a subset of Banishing .
438.5.	The card or token that is Replaced is placed in Banishment.
438.5.a.	While it resides in Banishment , it is considered to have been Replaced and not Banished .
438.6.	If a token is Replaced it will stop existing once it begins its occupancy in Banishment .
438.6.a.	This does not invalidate the token created, or the act of Replacement .
438.7.	Tokens that have been Created through a Replace action can be instructed to be “Swapped back.” This may also appear as “replace [the token] with the [Game Object] it replaced.”
438.7.a.	Swapping Back is an extension of the Replace action.
438.7.b.	To Swap Back , the token stops existing and the original card is returned to the space that the token just occupied, inheriting all current effects and statuses.
438.7.b.1.	Any card that has been Replaced by that token or any tokens it Replaced is eligible to swap back in this way.
438.7.c.	If there is nothing in Banishment to swap back to then this object can never swap back.
439.	Create
439.1.	Creating is the act of producing a Game Object that previously did not exist in the game.
439.2.	Effects that Create one or more Game Objects will direct where those Game Objects must go - the Game Objects are Created directly to the zones in question.
439.2.a.	Prior to being Created , these Game Objects did not exist outside of the zone they were Created to. After being Created , they may change zones as appropriate for Game Objects of their type.
439.2.b.	If a zone is not specified by the effect, the Game Object will be created to the appropriate zone for its type.

439.2.b.1.	Permanents will be Created at any location on the Board that they can be played to.
439.2.b.2.	Spells will be Created on the Chain.
439.2.b.3.	Runes will be Created at base.
439.2.b.4.	Legends will be Created in the Legend Zone.
439.2.b.5.	Battlefields will be Created in the Battlefield Zone.
439.2.c.	The zone a Game Object is created to can be specified implicitly by the Game Action being performed. <i>Example:</i> "Play a 1 [M] Recruit token" specifies a zone where the token is Created to implicitly, by specifying the token is played and thus created on the chain. <i>Example:</i> "Create a 1 [M] Recruit token" does not specify a zone, so the Recruit token will be created at any location on the board that it can be played to.
439.3.	An effect that Creates a Game Object will specify the state and nature of the Game Object created.
439.3.a.	If the Game Object is a token, it will follow the normal rules for tokens. <i>See rule 179. Tokens for more information.</i>
439.4.	Unless specified otherwise by the Game Effect that Creates a Game Object , any such Game Object is owned by the player who Created it. Control is established as usual for Game Objects of the appropriate type.
439.4.a.	A Created permanent, rune, legend, or spell is controlled by its owner as it is Created .
439.4.b.	A Created battlefield is uncontrolled as it is Created .
439.5.	This action, when instructed, is usually formatted as "Create [X] at [Y]" or "Add [X] to [Y]."
439.6.	Creating is a Limited Action .
439.6.a.	Players may only Create Game Objects when directed to by Game Effects .
440.	Burn
440.1.	Burning is the act of moving cards from the top of a player's Main Deck to their trash.
440.1.a.	"When you burn" abilities or other Triggered Abilities that trigger on burning are executed after burning has occurred.
440.2.	This action is formatted as "Burn X."
440.2.a.	X is the number of cards to be Burned .
440.3.	Burning is a Limited Action .
440.3.a.	A player must Burn cards when instructed to do so by game effects or costs.
440.4.	When Burning is part of an effect, then a player must Burn as many cards as possible. If instructed to burn more cards than they have in their main deck, they burn that many cards, burn out and then burn the rest. <i>See rule 431. Burn Out for more information.</i>
441.	Empower
441.1.	Empowering is the act of rendering one or more Game Objects Empowered .
441.1.a.	Empowered is a binary state. A Game Object is Empowered or it isn't.

441.1.b.	An Empowered Game Object can not be Empowered .
441.1.c.	If a Game Object is instructed to be Empowered when it is already Empowered , nothing additional happens.
441.1.c.1.	Some effects may grant a Game Object permission to be Empowered multiple times. Such an effect ignores this restriction.
441.2.	“Empowered” is a state for Game Objects on the board that other game effects and abilities can reference.
441.2.a.	When a Game Object becomes Empowered as a result of the Empower game action, that is an event that can similarly be referenced by game effects and abilities.
441.3.	Empowering is a Limited Action .
441.3.a.	Players may only Empower Game Objects when directed to by Game Effects .
442.	Disempower
442.1.	Disempowering is the act of removing the Empowered status from one or more Game Objects .
442.1.a.	Disempowering affects only cards that are currently Empowered .
442.1.a.1.	Game effects that instruct a player to Disempower a card that is not currently Empowered will do nothing.
442.2.	Disempowering is a Limited Action .
442.2.a.	Players may only Disempower Game Objects when directed to by Game Effects .
443.	Skip
443.1.	Skipping an event is the act of replacing that event with nothing.
443.1.a.	Skip is an action that interacts with events and procedures of the turn. Example: A card reads in part “Choose an enemy unit. Skip the next time that unit would move this turn.” This is a replacement effect that replaces the event of a unit moving with nothing. Example: A card reads in part “Skip your Draw phase.” This is a replacement effect that replaces a player’s Draw Phase with nothing. Example: A card reads in part “Choose a player. They skip their next point from conquering this turn.” This is a replacement effect that replaces the 1 point gained when conquering with nothing.
443.1.a.1.	An event is the singular moment that results from a Game Action being performed or from a Game Object changing state. See rule 367. Replacement Effects for more information.
443.1.a.2.	Procedures of the turn include turns, phases, steps, and substeps.
443.1.b.	Skip actions are usually formatted as “Skip [event or procedure of the turn].”
443.2.	When an event or procedure of the turn is Skipped , it is replaced with nothing. Play proceeds accordingly.
443.2.a.	Anything that triggers on the occurrence of the event or procedure of the turn does not trigger.
443.3.	Skip is a Limited Action .

443.3.a.	Players may only Skip events or procedures of the turn when directed to by Game Effects .
443.4.	Skip is a Replacement Effect . See rule 367. Replacement Effects for more information.
444.	Pay
444.1.	Paying a resource is the act of removing that resource from your Rune Pool .
444.1.a.	Pay is an action that interacts with Energy and Power .
444.2.	When a player is instructed to Pay a resource, that player may remove that resource from their Rune Pool if it exists there. If they choose not to, the instruction is ignored. <i>Example:</i> When Diana, Lunari's triggered ability resolves, if its controller has [1] Energy in their rune pool, they choose whether or not to pay that Energy as instructed. If they choose not to pay the Energy, they will not perform the additional effects of the triggered ability.
444.2.a.	If the instruction to Pay resources is part of paying costs for a card or ability, choosing not to pay those resources will cause the act of playing the card or ability to be undone. See rule 358. Check Legality for more information.
444.2.b.	If the instruction to Pay resources is part of paying any other cost, choosing not to pay those resources will prevent the execution of the associated effect. See rule 201. Costs for more information.
444.2.c.	Players may activate abilities that Add resources with the Reaction keyword at any time that they are instructed to Pay resources. Those abilities finalize and resolve immediately, ignoring normal restrictions. See rule 429. Add for more information.
444.3.	Pay is a Limited Action .
444.3.a.	Players may only Pay resources when directed to by Game Effects .
445.	Movement
446.	Moving is a Limited Action .
446.1.	A Permanent changing its position from any space on the Board to another space on the Board is a Move , unless it is caused by a corrective Recall or an Attached Permanent changing locations to or with its Top-Most Card. See rule 420. Move for more information.
446.2.	A card changing game zones does not in itself constitute a Move .
446.3.	Moving is instantaneous.
446.3.a.	There is no state for Permanents between locations.
446.3.b.	Permanents are either at their Origin before Moving or their Destination after Moving .
446.3.c.	Moving does not use the Chain , nor is it able to be Reacted to.
447.	Moving is defined by the Origin and Destination of the Permanent that is changing locations.
447.1.	The Origin is where the Permanent is starting from.
447.2.	The Destination is where the Permanent is going to.
447.2.a.	In Modes of Play with more than two players, Battlefields with Staged Combats or Combats in Progress are Invalid Destinations for Moves of all kinds (Standard Moves or otherwise) by Units controlled by Players not involved in those Combats or who don't

	already have units at that Battlefield .
447.2.b.	In Modes of Play with teammates, Battlefields occupied by a player's teammates are Invalid Destinations for Moves of all kinds (Standard Moves or otherwise) by Units that player controls.
447.2.c.	If an action would <i>require</i> a Move that would cause a Unit to become present in a Location where it cannot move for any reason, such as a Battlefield with two players that are <i>not</i> the controller of the Unit performing this Move action are in a Combat or such a Combat is Staged , it instead Recalls . <i>See rule 454. Recalls for more information.</i>
448.	Players may choose to move their Units with the Standard Move . <i>See rule 144. for more information on the Standard Move.</i>
449.	Spells, Abilities , or other effects may cause a Move to occur.
449.1.	The source of the Move will provide details on any restrictions on legality for Destination .
449.2.	Units cannot Move to a Battlefield that already has units from 2 other players present by any means.
450.	The Destination becomes Contested if it is an Uncontested Battlefield not controlled by the controller of the Unit or Units that moved.
451.	Units may cause a Non-Combat Showdown when they Move . <i>See rule 341. Showdowns for more information.</i>
452.	Units may cause Combat when they Move . <i>See rule 459. Combat for more information.</i>
453.	When a Move action is complete, perform a Cleanup .
454.	Recalls
455.	A Recall is when a Permanent is relocated from anywhere to its Base without it being a Move .
456.	Recalls are not Moves .
456.1.	They do not cause Triggered Abilities to trigger that are triggered by Move actions.
456.2.	A Recall causes a Permanent to change locations.
456.3.	A Recall cannot be prevented by actions and Game Effects that restrict or block Movement .
457.	Gear can be Recalled .
457.1.	When an un-attached non- Unit Gear is created or played at a battlefield, or is at a battlefield for any other reason, it is Recalled to its controller's base during the next Cleanup . <i>Example: An Equipment is attached to a unit at a battlefield, so the Equipment is present at that battlefield. If the unit dies, the Equipment will be recalled during the next cleanup.</i>
458.	Recalls do not affect the state of the Permanent being recalled.
458.1.	Unless otherwise stated by the source of the Recall , Damage and statuses of a permanent will all remain unaffected by a Recall .
459.	Combat
460.	A Combat occurs when a Cleanup occurs, there are no items on the Chain , there is a staged Combat at a Battlefield , and no Showdown or Combat is ongoing at any other Battlefield . <i>See rule 318. Cleanups for more information.</i>

460.1.	If there is an ongoing Showdown at the Battlefield where the Combat is staged, that Showdown will become a Combat Showdown and a Combat will be initiated there.
461.	Combat is considered Staged if there are units controlled by two opposing players at a Battlefield but the Steps of Combat have not been initiated.
461.1.	If more than one Battlefield has Units controlled by opposing players at it at the same time, the Turn Player decides which Combat to resolve first.
461.2.	If Staged Combats stop being Staged before the Steps of Combat are initiated, they are not resolved or executed.
461.3.	If a Combat and Showdown are staged at the same Battlefield and the turn player initiates the Showdown , it will open as a Combat Showdown .
462.	Combat can only occur between Units controlled by exactly two players.
462.1.	In Modes of Play with more than two players, Battlefields with Staged Combats or Combats in Progress are Invalid Destinations for Moves of all kinds (Standard Moves or otherwise) by Units controlled by Players not involved in those Combats or who don't already have Units at that Battlefield . <i>See rule 447.2.a. for more information on Invalid Destinations.</i>
462.2.	In Modes of Play with more than two players, Battlefields with Staged Combats or Combats in Progress are Invalid to be chosen as a location to play one or more Units by a player not involved in that Combat by any means.
462.2.a.	If an effect would <i>require</i> a Unit be played to a Battlefield with a Staged Combat or a Combat in Progress , where the controller of the played unit is not a participant, instead the Unit is played to its controller's Base .
462.2.b.	Any subsequent reference to "here" in the corresponding effect is reassigned to the Controller's Base , where the Unit was played. Any further effects that may be invalidated are invalidated as if the effect was mistargeted. <i>See rule 355.6. Targeting for more information on Mistargeting.</i>
462.3.	All choices that would result in a Combat occurring between more than two players simultaneously are invalid and ineligible to be completed.
463.	The Steps of Combat
464.	Step 1: The Combat Showdown Step
464.1.	Combat will open in one of two ways: when a Combat and Showdown are staged at the same Battlefield and the turn player initiates the Showdown ; or when the turn is in a Showdown Open State and a Combat is staged at the Battlefield where the current Showdown is ongoing. <i>See rule 318. Cleanups for more information.</i>
464.2.	<i>When Combat opens, it either opens with a Combat Showdown, or the current Showdown becomes a Combat Showdown.</i>
464.2.a.	The following Tasks become Outstanding , in the order described:
464.2.b.	1. Start of combat or showdown effects happen now.
464.2.c.	2. Establish who is Attacker and who is Defender .
464.2.c.1.	The Attacker is the player whose unit(s) applied the Contested status to the Battlefield .
464.2.c.1.a.	If a showdown opens as part of combat, this player gains Focus as the showdown begins.

464.2.c.1.b.	If a showdown was already ongoing when the combat opens, the player who has Focus maintains their Focus.
464.2.c.2.	The Defender is the player who did not apply the Contested status to the Battlefield .
464.2.c.3.	The attacker and defender gain the Attacker or Defender designation now, as appropriate. Units at the Contested Battlefield controlled by the Attacker or Defender gain the Attacker or Defender designation now, as appropriate.
464.2.c.3.a.	If a Unit controlled by the Attacker or Defender becomes present at this Battlefield after this moment, it will gain the Attacker or Defender designation during the Cleanup phase following the action that caused it to become present, as appropriate for its controller.
464.2.d.	3. The Attacker gains Focus .
464.2.e.	4. Add items to the Combat Chain if establishing Attacker and Defender has caused Triggered Abilities to become Pending .
464.2.e.1.	The Attacking player, who has Focus , places Triggered Abilities on the Chain first, followed by all non- Defender players in Turn Order , followed by the Defending Player .
464.2.f.	The State Closes if a Combat Chain was created.
464.2.f.1.	Otherwise the Combat Showdown continues, with the State Open as normal.
464.2.g.	Players proceed with any play on the Chain as normal.
465.	Step 2: The Combat Damage Step
465.1.	If both Attacking and Defending units remain at this battlefield, the following Tasks become Outstanding , in the specified order:
465.2.	1. When the Showdown closes, Attackers and Defenders resolve Combat Damage at the Battlefield that was attacked, using their current Might .
465.2.a.	Sum the Might of all Attacking Units .
465.2.b.	Sum the Might of all Defending Units .
465.2.c.	Starting with the Attacker , each player assigns an amount of damage equal to their summed Might among the other's Units .
465.2.c.1.	Assigning Damage is not Dealing Damage .
465.2.c.1.a.	When all Damage is assigned, it will be Dealt simultaneously. These actions are not synonymous.
465.2.c.2.	Abilities or effects may influence the order in which damage is assigned. Reminder: Lethal Damage is non-zero damage equaling or exceeding the Might of a Unit.
465.2.c.3.	Units must have lethal damage assigned to them in full before damage is assigned to a different Unit . <i>Example:</i> If a player has 5 damage to distribute among four 3 Might units, they may <i>not</i> choose to assign 2 damage to one of the units and 1 damage to each of the remaining 3. They must assign at least 3 damage to one, and the remaining 2 to another.
465.2.c.4.	Units cannot have more damage assigned to them than the minimum required to constitute lethal damage unless no further units remain to have damage assigned

	to them. <i>Example:</i> If a player has 5 damage to distribute among four 3 Might units and those units each have 1 damage already marked on them, that player may not assign more than 2 damage to any of those units.
465.2.c.4.a.	If the damage assigned to a Unit is modified to or replaced by an amount of damage larger than the initial value, the assigning player must choose the minimum applied value such that the unit would take lethal damage. <i>Example:</i> A unit with 3 [M] is being assigned damage in the combat damage step. There are other units without damage assigned to them with the same controller. The unit has a delayed replacement effect applied to it that reads “Double all damage that would be dealt to it this turn.” When assigning damage, the assigning player can only choose to assign 1 or 2 damage to this unit—when doing so, the assigned damage is doubled to 2 or 4 damage respectively. The minimum applied value such that the unit would take lethal damage in this way is 4 damage.
465.2.c.5.	When assigning damage in this way, replacement effects that would apply to the resulting damage are considered to apply to the assignment instead. <i>Example:</i> A unit with 2 [M] is being assigned damage in the combat damage step. The unit has “prevent the first 3 damage I would take each combat.” The unit would need to be assigned 5 damage in order to have lethal damage assigned to it. <i>Example:</i> The attacking player is assigning their 3 [M] worth of damage to two defending units with 2 [M] each. One of the units has a delayed replacement effect applied to it that reads “Double all damage that would be dealt to it this turn.” The attacking player assigns two damage to the other defending unit, then when assigning damage to the unit with the delayed replacement effect they assign 2 damage to it; 1 damage that doubles to 2 damage as it is assigned to the unit. When that damage is dealt, it doesn't get doubled again—the doubling is considered to have already happened during damage assignment. <i>Example:</i> The attacking player is assigning their 3 [M] worth of damage to a 2 [M] unit. That unit has a prevent value of two being applied to it, as well as the effect of Lotus Trap, doubling the damage dealt to them. Both of these replacement effects apply to the assignment of damage, in the order of the controller of the 2 [M] unit's choice. If they choose to order the replacement effects so that the prevent value is applied first, the unit will prevent 2 of the assigned damage, then the last 1 point of damage will be doubled to 2. The unit will have 4 damage assigned to it. When damage is dealt, the unit will take 2 damage. If they choose the other order, the unit will have 6 damage assigned to it, 2 of which will be prevented. When damage is dealt, the unit will take 4 damage.
465.2.c.6.	A player must obey all requirements and restrictions on damage assignment if able. <i>Example:</i> A player is assigning damage to the following units: a unit with Tank (“I must be assigned combat damage first.”); a unit with Backline (“I must be assigned combat damage last.”); and another unit without any abilities. That player must assign combat damage first to the unit with Tank, then to the unit with no abilities, then to the unit with Backline.
465.2.c.7.	If multiple Units have abilities or effects that require a player to assign them damage with the same priority, that player may assign damage to those units in any order. <i>Example:</i> A player is assigning damage to the following units: two units

	with Tank ("I must be assigned combat damage first.") and one unit with no abilities. That player chooses one of the units with Tank and assigns combat damage to it. Then they must assign any remaining damage first to the other unit with Tank, then to the unit with no abilities.
465.2.c.8.	If a Unit has one or more Abilities or effects applying to it that demand it be assigned damage in a specific way that is exclusionary, then the assigning player chooses only one of those abilities to apply when assigning damage. <i>Example:</i> Caitlyn, Patrolling with the Backline ability ("I must be assigned combat damage last.") has been given the Tank ability ("I must be assigned combat damage first."). A player is assigning damage to this Caitlyn with Tank and two units with no abilities. That player can't fulfill both of Caitlyn's damage requirements, so they may choose to assign damage to Caitlyn first, fulfilling the Tank requirement, or last, fulfilling the Backline requirement. They can't choose to apply damage to Caitlyn in between the other two units, because that wouldn't fulfill either requirement.
465.2.c.9.	If there is more than one unit in which this situation applies to, each unit is dealt with individually. The assigning player chooses which ability or effect applies, and then resolves the assignment. If this creates a situation where now more than one unit must be assigned with the same priority, those units may be assigned damage in any order as normal within that priority. <i>Example:</i> Two copies of Caitlyn, Patrolling with the Backline ability ("I must be assigned combat damage last.") have been given the Tank ability ("I must be assigned combat damage first."). A player assigning damage to these two Caitlyns and one unit with no abilities could choose to fulfill both Caitlyns' Tank requirements by assigning them both damage before the other unit.
465.2.c.10.	If a unit cannot be dealt damage, then no amount of damage can be considered lethal. Such a unit is exempt from any considerations of mandatory assignment. <i>Example:</i> Kayn, Unleashed says "If I have moved twice this turn, I don't take damage." While Kayn can't take damage, it is ignored for the purposes of assigning lethal damage in combat. <i>Example:</i> Counter Strike says "Choose a unit. The next time that unit would be dealt damage this turn, prevent it." The unit in question has a replacement effect applied to it, but it still can be dealt damage. Thus, it is not exempt from considerations of mandatory assignment.
465.2.d.	Deal Damage to each unit equal to the amount assigned to it.
465.3.	2. Skip the FEPR process and cancel any outstanding tasks. Proceed to the Resolution Step .
466.	Step 3: The Resolution Step
466.1.	1. Perform a Combat Cleanup .
466.1.a.	Invoke a Combat Special Cleanup .
466.1.a.1.	Insert "3c. Heal all Units ."
466.1.a.2.	Insert "3d. Recall Attackers present at the Battlefield if Defenders are still present." See rule 454. Recalls for more information.
466.2.	The following Task becomes Outstanding: <i>Reminder:</i> Resolve any items on the chain from dealing combat damage and the Combat Cleanup and associated FEPR before performing this step.
466.3.	1. Determine Combat Result

466.3.a.	A Player has won a combat if they received either the attacker or defender designation and are the only Player that has units remaining at this battlefield during this step.
466.3.b.	A Player has lost a combat if they received either the attacker or defender designation and are the only Player that does not have any units remaining at this battlefield during this step.
466.3.c.	Units at this battlefield inherit the same combat result as their controllers
466.3.d.	There is “No Result” if units were recalled during step 3d of the Combat Cleanup, if both Players have units present during this task, or if neither player has units present during this task.
466.3.d.1.	If “No Result” was reached, and both players have units remaining, stage a Showdown and a Combat at this battlefield.
466.4.	The following Task becomes Outstanding : <i>Reminder: Resolve any items on the chain from determining combat result and associated FEPR before performing this step.</i>
466.5.	1. If no Showdown or Combat is staged at this location, the player with Units remaining here Establishes Control if they didn’t already control this Battlefield.
466.5.a.	Clear the Contested Status .
466.5.b.	If there are no Units remaining here controlled by any player, the Battlefield becomes Uncontrolled .
466.5.c.	Remove all Hidden cards from this Battlefield that do not share a controller with the Battlefield .
466.5.d.	Establishing Control results in a Conquer if that player has not yet scored this Battlefield this turn. <i>See rule 188. Control for more information on Control.</i> <i>See rule 469.1. for more information on Conquering.</i>
466.5.e.	This does not have to be the player that applied Contested to the Battlefield .
466.6.	The following Task becomes Outstanding : <i>Reminder: Resolve any items on the chain from establishing control and associated FEPR before performing this step.</i>
466.7.	1. Combat ends.
466.7.a.	Remove Attacker and Defender Designation from all Units and Players .
466.7.b.	At the end of Combat or Combat ends effects take place.
466.7.c.	All “this combat” effects expire simultaneously.
467.	Scoring
468.	Scoring is the act of a Player gaining a point through the process of seizing or maintaining control over Battlefields .
468.1.	Every instance of Scoring is also an instance of Gaining points
469.	A player Scores in one of two ways:
469.1.	Conquer: A player gains Control of a Battlefield they did not yet Score this turn.
469.1.a.	In Modes of Play with teammates, Battlefields under the Control of a teammate during the

	scoring step of the Beginning Phase of a player's turn are also disqualified from being Scored through Conquer by any means by that player's team.
469.1.b.	A player will gain control of a Battlefield after establishing Control .
469.2.	Hold: A player maintains Control of a Battlefield they did not yet Score this turn during their Beginning Phase .
470.	A player may only Score , from either method, once per Battlefield per turn.
471.	When a player Scores , two things occur:
471.1.	The player Gains up to one Point , depending on their current score.
471.1.a.	The Final Point has additional restrictions.
471.1.a.1.	Notably, points Gained from sources that are not Conquer are not beholden to these restrictions.
471.1.b.	When a player tries to Gain a Point through a Conquer , and their current Point Total is 1 point from the Victory Score of the Mode of Play or higher, the following occurs:
471.1.b.1.	If the player has Scored every Battlefield this turn, that player Gains the Final Point . If the player has <i>not</i> Scored every Battlefield this turn, that player draws a card instead.
471.2.	Trigger Score abilities at the Battlefield that Scored .
471.2.a.	Conquer abilities trigger at a Battlefield that was Conquered .
471.2.b.	Hold abilities trigger at a Battlefield that was Held .
471.2.c.	These will only trigger when the Battlefield is Scored ; I.E. These cannot be triggered more than once per turn for a player.
472.	When a cleanup occurs and a player has accrued Points greater than or equal to the Victory Score for their Mode of Play , and if they have more points than any opponent, they Win the Game .
473.	Layers
474.	Layers are the mechanism in which Game Effects alter the Traits, Intrinsic Abilities, or other properties of Game Objects .
475.	Layers are an organizational structure.
475.1.	Layers only serve to structure the application and order that Game Effects apply to Game Objects to maintain consistency.
476.	The layers are applied repeatedly until all effects operating on objects have been applied once and no changes have been processed .
476.1.	Layers are applied in sequence. Each effect in them is applied as soon as able, and only a single time across all sequences.
476.2.	When a sequence of applications completes, recur the process, and evaluate each layer again applying any effects that may now be applicable.

476.3.	The removal or disqualification of an effect is separate from the application of the effect, but still can only be applied once. <i>Example:</i> Fiora, Victorious has printed Might 4 and says “While I’m Mighty, I have Deflect, Ganking, and Shield.” If a player places a buff on Fiora, her Might is increased in the Arithmetic layer, after the layer for Ability-Altering Effects. The Ability-Altering Effect layer is then re-checked and the abilities Deflect, Ganking, and Shield applied. Since each effect has been applied once and there are no other effects to apply, Fiora’s characteristics are finalized as 5 Might with Deflect, Ganking, and Shield. While a buffed Fiora, Victorious is in combat as a defender, an additional +1 Might will be applied in the Arithmetic layer, giving her 6 Might and the 3 keywords. <i>Example:</i> A buffed Fiora, Victorious is in combat as a defender when her buff is removed. Reevaluating the layers in sequence, she no longer gains Deflect, Ganking, and Shield during the Ability-Altering Effect layer, so when the Arithmetic layer is evaluated, neither the buff (which is gone) nor Shield (which she no longer has) apply. She goes directly from 6 Might with three keywords to 4 Might with no keywords.
477.	Layers are applied in the following order:
477.1.	1. Trait-Altering Effects
477.1.a.	This layer deals with effects that grant, remove, or replace inherent traits of Game Objects. Name Super Type Type Tags Controller Cost Domain
477.1.a.1.	Assignment of Might is dealt with in this layer. <i>Example:</i> A spell reads “A unit’s Might becomes 4 this turn.” The unit’s Might is set to 4 in this layer.
477.1.b.	Copy effects are applied in this layer.
477.1.b.1.	When one Game Object becomes a copy of another, all copyable traits replace or are added to those of the original Game Object as specified by the Game Effect directing the Copy. This is applied in this layer.
477.1.b.1.a.	Copyable traits are: Name Super Type Type Tags Cost Domain Rules Text
477.1.b.1.b.	Copy effects will copy the copyable traits of a Game Object. By default, those are the printed traits of the Game Object. When a Game Object becomes a copy of something, its copyable traits are updated to the new traits it has received. <i>Example:</i> A player triggers Leblanc, Deceiver’s hold effect and plays a Reflection token, making it a copy of Honest Broker. That player then plays Mirror Image, targeting the Reflection token. When the Mirror Image Reflection token is played, it copies all of the copyable traits of the original Reflection token - which are currently those of Honest Broker which it is a copy of. That player will have three units named Honest Broker in play, two of which are token Copies with Temporary.

477.1.b.2.	Some Game Effects may specify copying certain traits of a card. Only the traits specified by the Game Effect will be copied.
477.1.c.	Effects for this layer can be identified by the phrase "become(s)", "give," "is," or "are" in the text. <i>Example:</i> A permanent has the ability "Other friendly units are Yordles." Other friendly units gain the Yordle tag in this layer.
477.2.	2. Ability-Altering Effects
477.2.a.	This layer deals with non-Copy effects that grant, remove, or replace the abilities or rules text of Game Objects . Keywords Passive Abilities Appending rules text Removing rules text
477.2.b.	Effects for this layer can be identified by the phrase "become(s)," "give," "lose(s)," "have," "has," "is," or "are" in the text. <i>Example:</i> A permanent has the ability "Other friendly units have [Vision]." Other friendly units gain the Vision keyword in this layer.
477.2.c.	Abilities of Effect Text of Attached cards are appended in this layer.
477.3.	3. Arithmetic
477.3.a.	This layer deals with the mathematics of increasing and decreasing the numeric values of the traits of Game Objects . Might Energy Cost Power Cost
477.3.b.	When an arithmetic effect from a source that is not a passive ability has a limitation that applies, it is limited at the time of its application, and is "remembered" at that limited level for the duration of its effect. This process is called "snapshotting." <i>Example:</i> If an effect gives a unit "-4 [M] to a min of 1 this turn" choosing a unit with 2 [M], then the effect will generate -1 [M] this turn. <i>Example:</i> A unit reads "Units you control here have their Might increased to 5 [M]." This is a passive ability, so it will not snapshot. <i>Example:</i> A spell reads "Increase a friendly unit's Might to 5 [M]." This effect is applied once, with an unlimited duration. Because it isn't from a passive ability, it will snapshot.
477.3.c.	Players cannot increase a numeric attribute by a negative amount. If an effect would instruct a player to do so, they increase it by 0 instead. <i>Example:</i> A player plays Last Stand, which reads "Double a friendly unit's Might this turn. Give it Temporary." The player declares a 2 [M] unit as the target during finalization. In reaction to Last Stand, an opponent plays Eclipse targeting the 2 [M] unit. When Last Stand resolves, the unit is -2 [M]. Last Stand instructs its controller to increase the unit's Might by its current amount, -2, when the double action is performed. This is not possible, so the unit's Might is increased by 0 instead.
477.3.d.	Might Bonuses of Attached cards are applied in this layer.
477.3.e.	This layer applies arithmetic in the following way.
477.3.e.1.	1. Increases

477.3.e.1.a.	Positive values, or increases, to Might are applied first.
477.3.e.1.b.	If there is a restriction or limitation to this increase and it isn't from a passive ability, the limitation is "snapshotted" for the duration of the effect.
477.3.e.2.	2. Decreases
477.3.e.2.a.	Negative values, or decreases, to Might are applied last.
477.3.e.2.b.	If there is a restriction or limitation to this decrease and it isn't from a passive ability, the limitation is snapshotted for the duration of the effect.
478.	If more than one effect applies to the same Game Object in the Same Layer , or to each other in the same layer, then both effects will apply but their order may be determined by Dependency .
478.1.	A Dependency is established if:
478.1.a.	Applying one of the effects alters the existence of the other; or
478.1.b.	Applying one of the effects alters the number of objects the other effect can influence; or
478.1.c.	Applying one of the effects alters the outcome when applying the other.
479.	To determine which effect Depends on another, determine which of the prior criteria applies, and then also which effect's evaluation is altered by the sequence of applications. That effect is said to Depend on the other. <i>Example:</i> A unit with 4 [M] is under the effects of a passive ability that reads "Units you control here have their Might increased to 5 [M]." Its controller plays Discipline on the unit, giving it +2 [M]. When applying Layer alterations, both effects are applied in the same layer. If we apply the passive ability first, the passive ability will give +1 [M] while the Discipline effect will give +2 [M]. If we apply them in the other order, the Discipline effect will give +2 [M], and the passive ability will give +0 [M]. The passive ability is altered by the sequence of applications, so it depends on the Discipline effect.
479.1.	If both effects are altered by the application of the other, no Dependency can be established. <i>Example:</i> A unit with 4 [M] is under the effects of a passive ability that reads "Units you control here have their Might increased to 5 [M]." Its controller plays a spell that reads "Give a unit +2 [M], to a maximum of 5 [M]." If we apply the passive ability first, the passive ability will apply +1 [M] and the spell effect will apply +0 [M]. If we apply the spell effect first, it will apply +1 [M] while the passive ability applies +0 [M]. Both effects are altered by the sequence of applications, so we can't establish a dependency.
479.2.	To resolve a dependency, the effects within the same layer that created the dependency must be applied such that: 1. Identify which effect Depends on the other within the Layer. 2. Apply the effect that is depended on first. 3. Immediately apply the effect that Depends on the first effect next. <i>Example:</i> A unit with 4[M] is under the effects of a passive ability that reads "Units you control here have their Might increased to 5 [M]." Its controller plays Discipline on the unit. As previously established, the passive ability depends on the Discipline effect. We apply the Discipline effect first, giving the unit +2 [M], and then immediately apply the passive ability that depends on it. The unit's final Might is 6 [M].
480.	If more than one effect applies in the same layer but no dependency is established, then Timestamp order is applied to the effects within that layer and sublayer
480.1.	When an effect begins applying, it establishes a time for which it is compared against other Game Effects for purposes of resolving Layered effects as its Timestamp .
480.1.a.	Timestamps are not rote values.
480.1.b.	Timestamps are relative comparisons between effects and when they began applying to the game.

480.1.c.	Timestamps are not referenced by Game Effects in any way. They are only used to finalize layered effects.
480.2.	When Rules Text becomes Inactive for any reason, it loses its Timestamp . When it ceases to be Inactive , a new Timestamp is established.
480.3.	Effects are applied such that the earliest Timestamp within each Layer and Sublayer applies first, followed by other Effects in that Layer and Sublayer in chronological order.
481.	Modes of Play
482.	There are multiple methods of playing Riftbound .
483.	A Mode of Play must define several variables for the game.
483.1.	Number of Players: How many people are playing the game.
483.2.	Formation of Players: How the players are organized while playing.
483.2.a.	This defines if a player is alone or on a team.
483.2.b.	This defines the number of opponents.
483.3.	Victory Score: The point total a player or team must reach to win.
483.3.a.	Victory Scores can be any positive number.
483.4.	Battlefield Count: Determines how many Battlefields are in play, contributed by players, during play.
483.4.a.	This may influence deck building requirements in competitive settings.
483.4.b.	This may involve utilizing less Battlefields than there are players.
483.5.	Setup: Any changes to initial setup required for this mode.
483.6.	Format: Conditions to win or additional rules added over play.
483.7.	First Turn Process: Adjustments to each player's first turn.
483.8.	Unique Rules
483.8.a.	If any, they will be appended here.
484.	Sanctioned Modes
485.	1v1 (Duel)
485.1.	2 Players
485.2.	1v1 1 opponent each No teams
485.3.	Victory Score: 8
485.4.	Battlefield Count: 2
485.4.a.	Each player provides three (3) Battlefields , included in their deck during deck building. Only 1 will be used, chosen during setup.
485.5.	Setup: Each player randomly selects one (1) of their three (3) Battlefields . The other two are removed and will not be used for this game. The selected Battlefields are placed simultaneously in the Battlefield Zone .

485.6.	Format: Best of 1. The first player to reach the Victory Score in Points wins the Match .
485.7.	First Turn Process: The player going second channels an <i>extra</i> Rune from their Rune Deck during their first Channel Phase of the game.
486.	1v1 (Match)
486.1.	2 Players
486.2.	1v1 1 opponent each No teams
486.3.	Victory Score: 8
486.4.	Battlefield Count: 2
486.4.a.	Each player provides three (3) Battlefields , included in their deck during deck building. Only 1 will be used, chosen during setup.
486.5.	Setup: Each player selects one (1) of their three (3) Battlefields . The other two are set aside and will not be used for this round of play. The selected Battlefields are placed simultaneously in the Battlefield Zone . After this game, if a player won, the Battlefields that were used are to be removed and not selected again for this Match . One of the remaining Battlefields that were set aside must be chosen instead.
486.5.a.	If no player won a game, the battlefields presented for that game may be reused in a subsequent game.
486.6.	Format: Best of 3. The first player to reach the Victory Score in Points wins the game. The winner of that game earns One Game Win . Players then reset the game state, remove the Battlefields in play from the game, choose new Battlefields from those set aside, and play again. The first player to earn Two Game Wins wins the match.
486.6.a.	This format may be played as best of 5. In such a case, during games 4 and 5 of the match players may present a battlefield that has been removed from the game.
486.6.a.1.	Players may only re-use a battlefield in this way if they have already presented each of their battlefields at least once during the match.
486.6.a.2.	Players may not present a battlefield more than twice in a match when re-using battlefields in this way.
486.7.	First Turn Process: The player going second channels an <i>extra</i> Rune from their Rune Deck during their first Channel Phase of the game.
487.	FFA3 (Skirmish)
487.1.	3 Players
487.2.	FFA 2 opponents each No teams
487.3.	Victory Score: 8
487.4.	Battlefield Count: 3
487.4.a.	Each player provides three (3) Battlefields, included in their deck during deck building. Only 1 will be used, chosen during setup.

487.5.	Setup: Each player randomly selects one (1) of their three (3) Battlefields . The other two are discarded and will not be used for this game. The selected Battlefields are placed simultaneously between the three Players before play and will be used for this game.
487.6.	Format: Best of 1. The first player to reach the Victory Score in Points wins the Match .
487.7.	First Turn Process: The player going first <i>does not draw a card</i> during their first Draw Phase of the game. The player going last channels an <i>extra</i> Rune from their Rune Deck during their first Channel Phase of the game.
488.	FFA4 (War)
488.1.	4 Players
488.2.	FFA 3 opponents each No teams
488.3.	Victory Score: 8
488.4.	Battlefield Count: 3
488.4.a.	Each player provides three (3) Battlefields , included in their deck during deck building.
488.4.b.	The player who is taking the first turn removes their Battlefields . They will not be used.
488.5.	Setup: Each player who is not going first randomly selects one (1) of their three (3) Battlefields . The other two are removed and will not be used for this game. The selected Battlefields are placed simultaneously between the players before play and will be used for this game.
488.6.	Format: Best of 1. The first player to reach the Victory Score in Points wins the Match .
488.7.	First Turn Process: The player going first <i>does not draw a card</i> during their first Draw Phase of the game. The player going last channels an <i>extra</i> Rune from their Rune Deck during their first Channel Phase of the game.
489.	2v2 (Magma Chamber)
489.1.	4 Players
489.2.	2v2 2 opponents each 1 teammate
489.3.	Victory Score: 11
489.4.	Battlefield Count: 3
489.4.a.	Each player provides three (3) Battlefields , included in their deck during deck building.
489.5.	Setup:
489.5.a.	Each player who is not going first randomly selects one (1) of their three (3) Battlefields . The other two are removed and will not be used for this game. The selected Battlefields are placed simultaneously between the players before play and will be used for this game.
489.5.b.	The player who is taking the first turn removes their Battlefields . They will not be used.
489.5.c.	Turn order alternates teams.
489.5.c.1.	The first player will be followed by an opponent, then the first player's teammate, then the first opponent's teammate, and so on.

489.5.c.2.	If allies are sitting across from each other, turn order proceeds clockwise as normal.
489.5.c.3.	If allies are sitting next to each other, turn order is passed across the table.
489.6.	Format: Best of 1. The first team to reach the Victory Score in Points wins the Match .
489.6.a.	Teammates win or lose together.
489.6.a.1.	If one player Concedes , then the entire team loses.
489.6.a.2.	If one player Loses , then the entire team loses.
489.6.a.3.	If one player Wins , then the entire team wins.
489.7.	First Turn Process: The player going first <i>does not draw a card</i> during their first Draw Phase of the game. The player going last channels an <i>extra</i> Rune from their Rune Deck during their first Channel Phase of the game.
489.8.	Unique Rules
489.8.a.	Players may play spells or activate abilities during their Teammate's Turn . In order to do so, their Teammate will invite them to play a spell or activate an ability using their own Priority .
489.8.b.	Battlefields controlled during the Beginning Phase of a player's turn by that player's teammate are disqualified from being scored by that Team, that turn. <i>Example:</i> A player may not induce their partner to retreat, and then conquer a Battlefield their teammate was controlling.
489.8.c.	Control is not shared.
489.8.c.1.	Players may not Hide cards at Battlefields controlled by their Teammate.
489.8.c.2.	Players may not issue Standard Movement to their Teammate's Units .
489.8.d.	Points are shared by a team.
489.8.d.1.	Both players on a team have the same number of Victory Points .
489.8.d.2.	If a player gains or loses points, their team gains or loses those points.
489.8.d.3.	If a spell or ability references or checks a player gaining or losing points, that ability checks whether that player's team gains or loses points.
489.8.e.	Friendly describes controlled Game Objects by a player or their Teammate. <i>Example:</i> "When you play me, ready a <i>friendly unit</i> " could target a player's own Units or their teammate's Units.
489.8.f.	Hands are Private Information . Players may show their Private Information to one or more players at any time during play, including their teammate.
489.8.f.1.	Revealing Cards is still a game action and cannot be done unless instructed. <i>See rule 424. Reveal for more information.</i>
489.8.g.	The Final Point has an adjustment to the criteria when scoring.
489.8.g.1.	When scoring the Final Point from Conquer , a player must Score each Battlefield in the same turn, <i>excepting</i> any that were occupied by their ally during the scoring step of that turn's Beginning Phase . <i>See rule 467. Scoring for more information.</i>
489.8.g.2.	No other changes to Final Point restrictions.

489.8.h.	Teammates may not utilize the same Champion Legend .
489.8.i.	Teammates may not utilize the same Battlefields .
649.	Conceding
650.	A player may concede at any time.
651.	When a player concedes, they are removed from the game in progress.
651.1.	If only one other player is remaining after a player has conceded, the player remaining Wins .
651.2.	If more than one player remains after a concession, follow the steps for the Removal of a Player .
651.3.	Removal of a player involves them no longer being able to make choices or otherwise influence the game.
651.4.	If the player has Teammates due to the Mode of Play , that player's Teammates also lose and are removed from the game.
652.	If the game continues, follow these steps for Removal of a Player .
652.1.	Banish all permanents, runes, and facedown cards they currently control and all permanents, runes, and facedown cards they own.
652.2.	Remove the Battlefield they contributed to the game if it is in use.
652.2.a.	If it was in use, Replace it with a token battlefield with no abilities.
652.2.b.	Any units or hidden cards there do not move and are otherwise unaffected by this process. <i>See rule 438. Replace for more information.</i>
652.2.c.	If the removed battlefield was applying any continuous effects, those continuous effects immediately cease, which may cause changes in the characteristics of units or hidden cards there. <i>Example:</i> A battlefield reads "Units here have +1 [M]." If that battlefield's owner concedes and the battlefield is removed from the game as a result, units there immediately cease to get +1 [M].
652.3.	Remove all cards they own from the game.
652.4.	Counter all spells and abilities of all types controlled by the player that has conceded.
652.5.	Proceed with the game.
652.5.a.	Turn
652.5.a.1.	If the removed player was the Turn Player , play proceeds in Turn Order to the next available player in order.
652.5.b.	Focus
652.5.b.1.	If the removed player had Focus in a Showdown , the next Player in order receives Focus .
652.5.b.2.	If the player being removed creates a state where all Players have Passed their Focus , the Showdown ends and play proceeds as necessary, E.G. Combat is resolved or a Cleanup is completed.
652.5.c.	Priority
652.5.c.1.	If the removed player had Priority during a Chain , the next Player in order receives

	Priority.
652.5.c.2.	If the player being removed creates a state where all Players have passed Priority , then the most recent spell or ability on the Chain will resolve with Priority being re-established as appropriate for the state after the resolution of that spell or ability.
700.	Additional Rules
701.	Bufs
702.	Bufs are counters placed on Units .
702.1.	Bufs can be tracked with a buff reminder card from a Riftbound booster pack or with any spare object in your surroundings.
702.2.	Bufs can be added or spent.
702.2.a.	To Buff a Unit , a player chooses a Unit and then places a buff on it. That Unit is Buffered for as long as the buff remains on it.
702.2.b.	Spending a Buff removes a single Buff counter from a Unit .
702.2.b.1.	A buff cannot be spent from a Unit that does not have a buff.
702.2.b.2.	A player can only spend buffs on units they control.
702.3.	There can only be one Buff on a Unit at a time.
702.3.a.	If a Buff is added, or instructed to be added, on a Unit that already has a Buff , it is <i>not</i> placed instead.
703.	Each Buff individually contributes +1 Might to a Unit .
704.	Bufs are Game Objects and may be referenced, counted, or affected by other effects as specified.
704.1.	Bufs are counters, and thus are not targeted by spells and abilities. <i>See rule 741. Counters for more information.</i>
705.	If a Unit leaves play, remove all Bufs from it.
705.1.	Champions do not retain Bufs in the Champion Zone, even if they return there somehow.
706.	Mighty
707.	Mighty is a description that applies to some units. Other game effects can check whether a unit is Mighty .
708.	A Unit "is Mighty" as long as its Might is 5 or greater.
709.	A Unit "becomes Mighty" at the moment its Might changes from being less than 5 to being 5 or greater. <i>Example:</i> A Unit with Might 4 that gets +1 [M] becomes Mighty . <i>Example:</i> A Unit with Might 5 that gets +1 [M] does <i>not</i> become Mighty , because it was already Mighty .
710.	Units on the board are evaluated according to their current Might. <i>Example:</i> A unit with a base Might of 3 is targeted by a spell that reads "A unit gets +3 [M] this turn." As that spell resolves, its Might changes from 3 to 6, and it becomes Mighty . When that effect expires at the end of the turn, it will no longer be Mighty .

711.	Units in Non-Board Zones are evaluated according to their printed Might. <i>Example:</i> A unit in the trash is Mighty if its printed Might is 5 or greater. It doesn't matter if there were effects raising or lowering its might while it was on the board.
712.	Bonus Damage
713.	Bonus Damage is an intrinsic property that can be granted to Deal actions that influence the amount of Damage that the action is distributing.
714.	If more than one instance of Bonus Damage is applied or granted to a Deal action, all instances are summed and applied once.
714.1.	Bonus Damage can only be a positive value, and can only increase the amount of Damage being distributed.
714.2.	If, for any reason, Bonus Damage would be a negative number, then no Bonus Damage is applied to the action.
715.	Bonus Damage applies to the total damage Dealt by one instance of the action.
715.1.	If the Deal action has a single target, the amount of Damage to that target will be increased by the Bonus Damage granted to it.
715.2.	If the Deal action has multiple targets, the amount of Damage dealt to each target is increased by Bonus Damage individually and separately. <i>Example:</i> Singularity is a spell that says "Deal 6 to each of up to two units." A player plays Singularity while they also control Annie, Fiery, a unit that says "Your spells and abilities deal 1 Bonus Damage." Singularity deals 1 Bonus Damage to both of its targets, dealing 7 to each.
715.3.	If the Deal action Splits damage, then the Bonus Damage applies to the amount of Damage that will be Split . This can alter the number of targets eligible to be chosen. <i>Example:</i> Volibear, Furious is a unit that says in part "When I attack, deal 5 damage split among any number of enemy units here." A player attacks with Volibear, Furious while they also control Annie, Fiery, a unit that says "Your spells and abilities deal 1 Bonus Damage." Volibear, Furious now deals 6 damage split among any number of enemy units at its location, and can choose to split that damage among up to 6 units rather than the usual 5.
715.4.	If no damage was Dealt , then Bonus Damage will not apply. <i>Example:</i> Teemo, Strategist is a unit that reads in part "When I defend, choose an enemy unit here and reveal the top 5 cards of your Main Deck. Deal 1 to that unit for each card with Hidden revealed this way, then recycle the revealed cards." He has Rabadon's Deathcrown attached to him. An enemy unit moves to the battlefield where Teemo is located and a combat opens there. Teemo's controller reveals the top 5 cards of their Main Deck and reveals no cards with Hidden. Although the ability has 3 Bonus Damage from Rabadon's Deathcrown, no deal action is performed for the Bonus Damage to apply to.
715.4.a.	If Damage is replaced or reduced by any means, the replacing or reducing action will include the Bonus Damage in the total damage when determining how much damage is to be dealt. <i>Example:</i> A unit has prevent 3 applied to them. The unit is located at the Void Gate battlefield. An opponent targets the unit with Hextech Ray. Hextech Ray deals 4 damage to the unit, including the Bonus Damage from Void Gate, which the prevent effect will prevent 3 of. The unit takes 1 damage.
716.	Attachment
717.	Attaching is a limited action that causes cards to become linked to each other to combine their effects in some way. This causes one card to become Attached and the other to become A Top-Most Card . <i>See rule 434. Attach for more information.</i>

718.	Attached is the state of a card being linked to another card in this way.
718.1.	A card remains in this state until Detached .
718.2.	While in this state, the card's printed Rules Text is Inactive . <i>See rule 720. Inactive for more information.</i>
718.3.	While in this state, Abilities in the card's Effect Text are appended to the Rules Text of the Top-Most Card .
718.4.	While in this state, the card's Might Bonus modulates the Top-Most Card's Might by the value listed.
718.5.	Attached cards still have all properties of being a card on the board while in this state.
718.5.a.	Attached cards still have all Types and Tags while Attached .
718.5.b.	Attached cards still can be chosen or targeted by game effects while Attached .
718.5.c.	Attached cards cannot be moved separately from the Top-Most Card they are Attached to.
718.5.d.	A card may be Attached only to a single Top-Most card at a time.
718.5.e.	Attached cards may have different Controllers from their Top-Most card .
718.5.f.	Changes in Control of the Top-Most card do not impact Control of Attached cards and vice versa.
718.5.g.	An Attached card still appends the abilities in its Effect Text to the Rules Text of the Top-Most card and modulates the Top-Most Card's Might by its Might Bonus .
719.	A Top-Most Card is a card that has one or more cards linked to it through the process of Attaching .
719.1.	The Effect Text of all cards Attached to this card are appended to the Rules Text of this card for as long as they remain Attached .
719.2.	This card ceases being a Top-Most Card when there are no longer any cards Attached to it.
719.3.	A Top-Most Card and all cards Attached to it are at the same location.
719.3.a.	When the Top-Most Card changes locations, all Attached cards change locations with it.
719.4.	The Exhausted and Ready state of the Top-Most card does not affect nor change the status of the Attached cards and vice versa.
719.4.a.	This is true of all statuses aside from location, Attached , and Top-Most . <i>Example:</i> If the top-most card becomes stunned, it does not affect the state of any attached cards. <i>Example:</i> If an attached card becomes empowered, it does not affect the state of its top-most card.
719.5.	When a Top-Most Card changes zones from a board zone to a non-board zone, all Attached cards Detach from it, remaining in their current zones.
719.5.a.	The player that controls the Top-Most Card that changed zones decides the order these cards Detach in, and thus the order of any relevant effects that occur due to the Detach occurring.
720.	Inactive
721.	Card text can occasionally be assigned to be ignored, disregarded, or otherwise rendered as not applicable

	during the course of play. This state is referred to as Inactive .
721.1.	Text marked this way is not applied at all while in this state.
721.2.	Inactive Abilities do not trigger, do not apply, and cannot be activated. Inactive instructions are not processed.
722.	Inactive text is still present on cards.
722.1.	Cards with Inactive text still have keywords for the sake of Game Effects that want to reference or see if a card has a keyword.
722.2.	Game Effects that parse or interpret text to determine target eligibility may still parse Inactive text for the sake of eligibility. <i>Example: Spinning Axe is a gear with [Temporary]. While it's attached and its rules text is inactive, its [Temporary] ability doesn't trigger. However, a spell that reads "Destroy a gear with [Temporary]" could still choose and destroy Spinning Axe.</i>
723.	Rules Text is never Inactive by default.
724.	Effect Text is Inactive unless the card with the Effect Text is Attached .
725.	Inactive text can partially cease to be Inactive under specific circumstances and exceptions.
725.1.	If an Attached card has a Passive or Replacement ability that applies during the process of Attaching or a Triggered ability that triggers off of Attaching , that text exists and can be processed as it Attaches .
725.2.	If an Attached card has a Passive or Replacement ability that applies during the process of Detaching or a Triggered ability that triggers off of Detaching , that text exists and can be processed as it Detaches .
725.3.	If an Attached card has an Equip ability, the Weaponmaster keyword can reference that Equip ability and any abilities that passively modify that Equip ability.
725.4.	If a Dependent Ability is a Triggered Ability whose condition occurs at the same time as the Dependent Keyword's condition being fulfilled, that text exists and can be processed as it is fulfilled.
726.	Dependent Keywords
727.	Keywords can be Dependent Keywords
727.1.	A Dependent Keyword is comprised of both a Condition that it is short for, and an ability of some format immediately after the Keyword itself. <i>Example: Noxus Hopeful has "[Legion][>] I cost [2] less." [Legion] is short for the condition "if you have played another card this turn, this card gains [Text]," while "I cost [2] less" is the dependent ability.</i>
727.1.a.	A Dependent Keyword will always be functionally short for a Condition .
727.1.a.1.	This Condition may also have a determined Duration , Time , or Limitation as part of its definition. <i>Example: Legion specifies the duration of its condition: "if you have played another card this turn." This turn is the duration.</i> <i>Example: A dependent keyword that is short for "Until you have spent [3] this turn" would include a limitation on its condition.</i> <i>Example: A dependent keyword that is short for "After you've attacked this turn" would include a time after which the condition is active.</i>
727.1.b.	The Dependent Ability associated with the Dependent Keyword is Inactive on the card

	with the Dependent Keyword until the Condition is met, when it becomes Active
727.1.b.1.	The Dependent Ability is present on the card for the sake of reference or evaluation until the Condition is met <i>See rule 720. Inactive for more information</i>
727.1.b.2.	The Dependent Ability is Active exactly as written while the Condition is true <i>Example: Gustwalker has "[Level 3][>] I have +1 [M] and Ganking." As long as its controller has 3 XP, Gustwalker's Ganking is active.</i>
727.1.b.3.	If an ability has multiple Dependent Keywords , all of them must have their Condition met in order for the ability to be active. <i>Example: A unit reads "[Level 11][>>][Legion][>] When you conquer, gain 1 point." In order for the conquer effect of the unit to be active, its controller must have 11 XP and have finalized a card other than the unit that turn.</i>
727.1.c.	The Dependent Abilities of Dependent Keywords can be of any type
727.1.c.1.	Triggered Abilities of Dependent Keywords must be Active for their trigger to be evaluated.
727.1.c.1.a.	If a Triggered Ability becomes active at the same time as its trigger condition would be fulfilled, it triggers.
727.1.c.2.	Passive Abilities begin applying at the same time the Dependent Keyword becomes true.
727.1.c.3.	Activated Abilities that become Active from Dependent Keywords can be activated at their associated timing after that ability has been granted
727.1.c.3.a.	If the condition for the Dependent Keyword causes the Activated Ability to become Inactive after it has been added to the chain as a Pending Item , that chain item will not be affected and will proceed with being played as normal.
728.	XP
729.	XP is a resource that is accrued, spent, or otherwise modified by Players through the course of play.
729.1.	The amount of XP that a player has should be marked clearly.
729.1.a.	XP is a value that can be tracked by counters, dice, cards, or any method that clearly displays the specific value of XP that is currently on a Player .
729.2.	The amount of XP a Player has is Public Information .
730.	XP can be Gained and Spent .
730.1.	To Gain XP , increase the value of XP marked on the Player gaining it.
730.2.	To Spend XP , reduce the value of XP marked on the Player spending it.
731.	XP is not a Game Object .
731.1.	XP cannot be targeted, readied, or exhausted.
732.	XP is not shared between Allies in Game Modes with Teammates .
733.	There is no limit to an amount of XP a player can accrue.
734.	Additional Turns

735.	Certain Game Effects will instruct a player to “take a turn after this.” These effects create a temporary Additional Turn owned by that player that is inserted into the turn queue after the current turn.
736.	Turn order is established when the game begins as a repeating set of players. This populates a looping queue of turns that each player will take, starting with the first turn taken by the First Player, and repeating indefinitely.
737.	When an Additional Turn is inserted into this queue, it does not change the Turn Order of the game. The owner of the Additional Turn just has the next queued turn. After that turn is completed, it will be removed and the queue will proceed with its previously queued turns.
738.	If multiple Additional Turns are queued, they are added to the queue in the order the Game Effects that generated them occurred. <i>Example:</i> The First Player plays, through some means, two Time Warps during their turn. The Time Warps create two Additional Turns for their controller and insert them into the turn queue after the current turn. If the turn queue is represented as [> A > B > C > D >], then these Additional Turns will appear as [> A > A* > A* > B > C > D >]. After the last Additional Turn is played, the queue returns to its previously queued turns. The “*” denotes that a turn is an Additional Turn. <i>Example:</i> The First Player plays Promising Future during their turn, during the resolution of which the Second and Fourth Player choose, banish, and play one Time Warp each. The Fourth Player’s Time Warp resolves first, inserting an Additional Turn for them in the queue as such: [> A > D* > B > C > D >]. The Second Player’s Time Warp resolves afterwards, inserting that turn: [> A > B* > D* > B > C > D >]. When the First Player passes the turn, the Second Player will take their turn, followed by the Fourth Player, after which the queue returns to its previously queued turns.
739.	Special Terms
740.	Card text and this rules document use certain terms in specific ways that are different from their common usage.
740.1.	Some card text refers to Game Objects in particular ways:
740.1.a.	Two Game Objects are friendly if they share a controller, or if one’s controller is teammates with the other’s.
740.1.b.	Two Game Objects are enemies if one’s controller is an opponent of the other’s.
740.2.	Some card text refers to Units in particular ways:
740.2.a.	A unit is alone when there are no other friendly units at the same location.
740.2.b.	A unit is one on one when it and the enemy unit at the same location are both alone .
740.2.c.	A unit is in combat if it is occupying a battlefield where combat is ongoing and has a combat designation.
740.3.	Some card text refers to specific terminology:
740.3.a.	A tie occurs when there are units controlled by different players located at a battlefield where combat is taking place during the step 3d of the combat cleanup.
740.4.	Some terms in this document are used in particular ways:
740.4.a.	Costs within instructions are instructions that take a particular form (“[do X] to [do Y]”). [Do X] is the cost associated with the instruction, and [do Y] is the effect.
740.4.a.1.	For spells, costs within instructions are paid on resolution of the spell. In order to get the effect, the cost must be paid.
740.4.a.2.	For triggered abilities, costs within instructions that appear in the first part of the trigger effect are paid on finalization of the triggered ability. In order to place the

	triggered ability on the chain, the cost must be paid.
740.4.a.2.a.	Costs within instructions that appear in any later part of the trigger effect are paid on resolution.
741.	Counters
742.	Counters are Game Objects generated by and given to other Game Objects on the board during play.
743.	Counters serve to track semi-permanent effects on Game Objects .
744.	Counters can have game effects themselves, or serve as the prerequisite for game effects.
745.	Counters can be spent by game effects.
745.1.	In order to do so, that player must remove that many counters of the specified type from the specified Game Objects .
745.1.a.	If no type of counter is specified, any counter can be removed this way.
745.1.b.	If no type of Game Object is specified, then counters can be removed from any Game Objects with the specified counter.
745.2.	In order to spend a Counter , the spending player must control the Game Object the Counter is placed on.
746.	Some effects may move a Counter between two Game Objects . The Counter is either on the first Game Object or the second. There is no state for a Counter being between either object.
747.	Counters that leave a Game Object without being placed on another game object cease to exist.
748.	Game Objects that change zones to a non-board zone lose all of their Counters . <i>See rule 124. for more information on temporary modifications.</i>
749.	Counters do not have a controller.
750.	Making New Choices
751.	Some Game Effects will instruct a player to make new choices for a finalized item on the chain.
751.1.	Making new choices in this way requires a player to choose Game Objects, players, zones, or modes that were previously not being chosen by the chain item.
752.	This refers to the choices normally made during finalization, with some exclusions. <i>See rule 355. Make Relevant Choices for more information.</i>
752.1.	The relevant choices that can be remade for these Game Effects are locations to be played to, modes, destinations, and targets.
752.2.	This does <i>not</i> refer to any choices made “as you play this” or “as I am played,” or any choices made for Optional Additional Costs.
753.	When making new choices in this way, a player can choose any subset of the possible choices to remake, so long as doing so doesn’t lead to an illegal state.
753.1.	A player may not make new choices this way that would be illegal or that would lead to an illegal state, even if there are no other options.
753.2.	A player may not choose to make new choices for a spell or ability if there aren’t legal choices that they could make in this way.
754.	If, as a result of new choices, the spell or ability targets a Game Object it previously did not target, any

	Targeting Effects of that Game Object will trigger as appropriate at that time.
755.	Any costs “to play” the spell or ability that are incurred as a result of new choices made in this way are ignored.
755.1.	The spell or ability is already played and its costs paid. Any further costs incurred have no effect on the finalized chain item.
756.	Untargetability
757.	Some Game Effects declare that a Game Object can’t be chosen by a certain set of spells and abilities. Those effects designate the Game Object as Untargetable .
757.1.	These passive abilities will usually take the form “[Game Object] can’t be chosen by [Category] spells and abilities.” <i>Example:</i> Ruin Runner’s passive ability reads “I can’t be chosen by enemy spells and abilities.”
758.	Untargetable Game Objects are not legal targets for the indicated spells and abilities. <i>See rule 355.6. Targeting for more information.</i>
758.1.	If a Game Object becomes untargetable for a spell or ability after becoming its target and before it resolves, the spell or ability will mistarget on resolution. Any instructions related to that Game Object will be ignored as the spell resolves.
758.2.	If the spell or ability changes for any reason such that it will no longer fall under the category of spells or abilities for which a Game Object is untargetable, the Game Object will become a legal target for that spell or ability. <i>Example:</i> A 1 [M] unit reads “I can’t be chosen by enemy spells or abilities with Energy cost less than my Might.” That unit is targeted by an enemy Falling Star; in reaction to the Falling Star, the unit’s controller plays Discipline targeting that unit, bringing its Might to 3 [M]. If Falling Star resolved at that point, the unit would be unaffected by it as it resolves. Falling Star’s controller plays Eclipse before Falling Star resolves, bringing the unit’s Might to -1 [M]. When Falling Star resolves now, the unit is affected by the spell and has 6 damage marked. It dies in the following cleanup.
758.2.a.	This will also occur if the Game Object is no longer among the set of objects that are made untargetable by a Game Effect . <i>Example:</i> Alpha Wildclaw and Vilemaw are controlled by the same player and located at a battlefield. An opponent targets Vilemaw with Rebuke. Before Rebuke resolves, Vilemaw’s controller plays Discipline targeting Alpha Wildclaw, making Vilemaw no longer a legal target. Rebuke’s controller then targets Alpha Wildclaw with Star-Crossed. When Star-Crossed resolves, Alpha Wildclaw’s passive ability no longer applies to Vilemaw, making it a legal target for Rebuke. After all spells and abilities have resolved, both Vilemaw and Alpha Wildclaw will be returned to hand.
759.	Naming Cards, Types, and Tags
760.	Some Game Effects may instruct a player to name or guess a card, type, or tag.
761.	The act of naming a card in this way may be accomplished in one of two ways:
761.1.	1. Stating the exact name of the card. <i>Example:</i> “Kai’Sa, Evolutionary” identifies the card Kai’Sa, Evolutionary.
761.2.	2. Identifying a combination of traits and characteristics that can identify that card uniquely. <i>Example:</i> “The blue Kai’Sa,” “the 6 [M] Kai’Sa” or “the [6] Energy Kai’Sa” are sufficient to identify Kai’Sa, Evolutionary when there are no other cards that satisfy those traits. <i>Example:</i> If there is only one unit with Kato in their name, saying “Kato” is sufficient to identify the card in question even if the exact name of the card is “Kato the Arm.”
762.	When instructed to name a card, a player must name a card that is legal in the Format being played.

762.1.	They cannot name a card that doesn't exist.
762.2.	A player cannot choose the name of a token when instructed to name a card.
763.	When instructed to name a tag, a player cannot choose to name a tag that does not exist on cards or tokens in Riftbound.
763.1.	The following tags exist in Riftbound: Ahri, Akali, Akshan, Ambessa, Anivia, Annie, Aphelios, Ashe, Azir, Bandle City, Bard, Bilgewater, Bird, Blitzcrank, Caitlyn, Cat, Darius, Demacia, Demon, Diana, Dog, Dr. Mundo, Dragon, Draven, Ekko, Elite, Equipment, Evelyn, Ezreal, Fae, Fiora, Fizz, Freljord, Galio, Gangplank, Garen, Heimerdinger, Hwei, Icatia, Illaoi, Ionia, Irelia, Ivern, Ixtal, Janna, Jax, Jayce, Jhin, Jinx, Kai'Sa, Karma, Karthus, Katarina, Kathkan, Kayle, Kayn, Kennen, Kha'Zix, Kog'Maw, LeBlanc, Lee Sin, Leona, Lillia, Lucian, Lux, Malzahar, Master Yi, Mech, Mel, Miss Fortune, Morgana, Mount Targon, Nami, Nasus, Nidalee, Nilah, Nocturne, Noxus, Ornn, Piltover, Pirate, Poppy, Poro, Pyke, Qiyana, Recruit, Rek'Sai, Rell, Renata Glasc, Renekton, Rengar, Riven, Rumble, Sentinel, Sett, Shadow Isles, Shen, Shurima, Sivir, Sona, Soraka, Spider, Spirit, Swain, Syndra, Taric, Teemo, The Void, Trifarian, Tryndamere, Twisted Fate, Udyr, Vayne, Vex, Vi, Viktor, Volibear, Warwick, Xerath, Xin Zhao, Yasuo, Yone, Yordle, Yuumi, Zaun, Zed, Zilean.
764.	Ignoring Effects
765.	Some Game Effects may instruct players to ignore abilities while performing a game action or procedure.
766.	Any abilities ignored in this way are treated as inactive for the purposes of the game action or procedure. <i>Example:</i> A spell reads "Ignore Deflect while paying this spell's costs." Any instances of the Deflect keyword on relevant units are treated as inactive while paying the costs of the spell. <i>Example:</i> A unit reads "You ignore Backline while assigning combat damage here." While assigning combat damage in the combat damage step with this unit present, any instances of Backline on enemy units is treated as inactive. The unit's controller can assign damage to any units with Backline as if they didn't have it.
767.	Ignored abilities are only treated as inactive for the specific game action or procedure described, and only by the players directed by the ability. <i>Example:</i> A spell reads in part "Ignore Deflect while paying this spell's costs." If another player attempts to play a spell targeting the same units that the above spell does, that other spell will not ignore Deflect. <i>Example:</i> A unit reads "You ignore Backline while assigning combat damage here." Any other player assigning combat damage at the same location as that unit will not be able to ignore Backline.
800.	Keywords
801.	A Keyword is a specific term that appears on Cards that acts as a shorthand for a specific game effect, or ability of any variety.
801.1.	A Keyword can be an ability.
801.2.	Keywords can be identified by having a colored highlight behind them.
801.2.a.	The color of the highlight has no effect on gameplay.
801.3.	Keywords can be referenced or specified by other Game Effects .
801.3.a.	Other effects may grant Keywords .
801.3.a.1.	The definition and rules of the specific Keyword will determine the behavior if a Keyword is granted while it is already present.
801.3.a.2.	The effect that granted the Keyword will specify the duration for which it is granted.

801.3.a.3.	If an effect that grants a Keyword does not specify a duration, the duration is as long as that Game Object remains on the Board or in its current Non-Board Zone .
801.3.b.	Other effects may remove Keywords .
801.3.b.1.	The effect that removed the Keyword will specify the duration it is removed.
801.3.b.2.	If an effect that removes a Keyword does not specify a duration, the duration is as long as that Game Object remains on the Board or in its current Non-Board Zone .
802.	A card can have any number of Keywords .
803.	Similar to other rules text, execute any effects of Keywords in the order listed when reading the card from top to bottom of the rules text.
804.	Keyword Glossary
805.	Accelerate
805.1.	Accelerate is a Unit ability.
805.1.a.	Accelerate is functionally short for "As you play me, you may pay [1][C] as an additional cost. If you do, I enter ready."
805.1.a.1.	If the unit has one or more domains, the Power portion of the Accelerate cost can be paid only with a Power that matches one of the domains of the unit.
805.1.a.2.	If the unit has no domain, the Power portion of the Accelerate cost can be paid with [A] (a Power of any domain).
805.2.	Accelerate is an Optional Additional Cost to be paid as a player plays the unit with the ability.
805.2.a.	Accelerate costs cannot be paid while the unit is on the board, only as part of the steps of playing a card.
805.2.b.	Paying the cost generates a delayed Replacement Effect. Even if the unit loses the accelerate keyword during the finalization process, as long as the cost was paid, that unit will still enter ready.
805.3.	Accelerate has no function while on the board.
805.4.	Multiple instances of Accelerate are redundant.
805.5.	Accelerate, and whether or not a unit has Accelerate, is a characteristic of the Unit and may be checked or referenced by other Game Effects .
805.6.	Accelerate generates a delayed replacement effect that replaces a unit entering the board exhausted with it entering ready. It does not enter exhausted and then become ready.
805.6.a.	Accelerate will not interact with, or trigger, abilities that are affected by units becoming ready.
806.	Action
806.1.	Action is a Permissive keyword.
806.1.a.	It is present on Cards, Rune Abilities, Legend Abilities or Permanent Abilities .
806.1.b.	Action grants the corresponding card or effect permission to be played or activated during Showdowns , even when it is not the Controlling player's turn.
806.1.c.	Action is functionally short for the following:

806.1.c.1.	On Cards: "This can be played during showdowns on any player's turn."
806.1.c.2.	On Activated Abilities: "This can be activated during showdowns on any player's turn."
806.1.d.	Action is formatted as "[Action]" on spells, or "[Action][>]" on abilities.
806.2.	The card or effect with this keyword is not restricted to showdowns. This permission is inclusive of all other timings and options available to the ability as written or by default.
806.3.	Action does not alter the function of any instruction of the corresponding card or effect it is on. It is <i>only</i> permission. <i>Example:</i> Playing a Unit with Action still has the inherent restrictions of playing Units without Action. It can only be played to the controlling player's base or a battlefield they control.
806.4.	Some passive abilities may grant a card or ability Action under certain conditions. The card or ability does not have the Action keyword unless and until those circumstances are true.
806.4.a.	Those conditions might only be fulfilled while the card or ability is on the chain. In such a case, it can still be played or activated at the appropriate timing as long as doing so <i>could</i> fulfill the conditions.
806.4.b.	If the chain item does not fulfill the conditions by the time step 5: check legality has been reached, the actions taken while playing it are undone and it is returned to the zone it was played from if it is a card.
806.5.	Action is a referenceable characteristic.
806.5.a.	Whether or not a Game Object has Action is a characteristic of that Game Object and may be checked or referenced by other Game Effects .
806.5.b.	Whether or not a Spell has Action is a characteristic of that Spell and may be checked or referenced by other Game Effects .
806.5.c.	Whether or not an Ability has Action is a characteristic of that Ability and may be checked or referenced by other Game Effects .
807.	Assault
807.1.	Assault is a Passive Ability keyword.
807.1.a.	It is present on Units.
807.1.b.	Assault is formatted as "Assault [X]".
807.1.b.1.	The X is referenced in the functional text of the ability.
807.1.b.2.	The X is referred to as the Assault Value.
807.1.b.3.	If X is omitted, it is presumed to be 1.
807.1.c.	It is functionally short for "While I am an attacker, I have +X [M]."
807.1.d.	Being an attacker means the Unit has gained the Attacker designation during Combat. <i>See rule 459. Combat for more information.</i>
807.1.d.1.	Assault remains in effect as long as the Unit maintains the Attacker designation.
807.2.	If a Unit has Assault or has been granted Assault and is granted Assault by an additional source, the Assault Value of all granted Assault keywords is summed. <i>Example:</i> Petty Officer has Assault. It is chosen as the target of Cleave, which says "Give a unit

	[Assault 3] this turn." After Cleave resolves, Petty Officer has Assault 4 this turn.
807.3.	Assault, and whether or not a unit has Assault, is a characteristic of the Unit and may be checked or referenced by other Game Effects .
808.	Deathknell
808.1.	Deathknell is a Triggered Ability keyword.
808.1.a.	It is present on Permanents .
808.1.b.	It is formatted as "[Deathknell][>] [Effect]".
808.1.b.1.	[Effect] is the rules text for the specific instance of Deathknell. This is referred to as the Deathknell effect.
808.1.c.	It is functionally short for "When I die, [Effect]."
808.1.c.1.	[Effect] is the rules text of the Deathknell effect.
808.1.d.	The Trigger for this and similar effects that trigger on their source's death is the Permanent being Killed and sent to the Trash .
808.1.d.1.	If the Permanent with the effect is not sent to the Trash, for example because its "killed" event was replaced with a recall, the triggered ability will be removed from the chain. <i>Example: Draven, Audacious is killed in combat. Draven reads in part "When I die in combat, choose an opponent. They gain 1 point." Draven's controller has a Zhonya's Hourglass in base. Draven's death is replaced by him being healed, recalled, and exhausted. Draven's triggered ability will be removed from the chain.</i>
808.1.d.2.	The trigger will be added to the chain as a Pending Item before the card with an ability that triggers on its own death is moved to the trash due to a Kill instruction or a Cleanup .
808.1.d.3.	Before the card is moved to the Trash , note its location, its attributes, and any other details related to the effect of its triggered ability to process the trigger after it has been Finalized .
808.2.	Each instance of Deathknell a Permanent may have will trigger separately.
808.2.a.	The controller will choose the order to add these Triggers to the chain.
808.3.	Deathknell, and whether or not a permanent has Deathknell, is a characteristic of the permanent and may be checked or referenced by other Game Effects .
809.	Deflect
809.1.	Deflect is a Passive Ability keyword.
809.1.a.	It is normally present on Permanents.
809.1.b.	It is formatted as "Deflect [X]".
809.1.b.1.	The X is referenced in the functional text of the ability.
809.1.b.2.	The X is referred to as the Deflect Value.
809.1.b.3.	If X is omitted, it is presumed to be 1.
809.1.c.	It is functionally short for "Spells and abilities an opponent controls that target [me/this] cost

	an amount of Power equal to [Deflect Value] more to play as an additional cost for each time they choose [me/this]."
809.1.c.1.	The Power used to pay this cost may always be of any Domain. <i>Example:</i> A Fury spell targets an Order unit with Deflect. The Power used to pay the Deflect cost can be any Domain; it does not need to match the Domain of the spell or the target.
809.1.d.	It is an effect that imposes a Mandatory Additional Cost on Spells and Abilities that choose the Game Object that has this ability. See rule 349. Playing Cards for more information.
809.2.	If a Game Object has Deflect, or has been granted Deflect, and is granted Deflect by an additional source, the Deflect Value of all granted Deflect keywords is summed.
809.3.	Deflect, and whether or not a Game Object has Deflect, is a characteristic of the permanent and may be checked or referenced by other Game Effects .
810.	Ganking
810.1.	Ganking is a Passive Ability keyword.
810.1.a.	It is present on Units.
810.1.b.	It is functionally short for "I may move to a battlefield from another battlefield with a standard move."
810.1.c.	It is a passive ability that adds permissions to the Unit's Standard Move.
810.1.c.1.	It does not restrict or remove options from the Unit's Standard Move.
810.1.c.2.	It does not have an activation cost.
810.1.c.3.	It does not give additional abilities or activations of Movement, only new options for the Standard Move.
810.2.	Multiple instances of Ganking are redundant.
810.3.	Ganking, and whether or not a unit has Ganking, is a characteristic of the Unit and may be checked or referenced by other Game Effects .
811.	Hidden
811.1.	Hidden is a keyword that acts as a prerequisite to perform the Hide Discretionary Action.
811.1.a.	It is present on Spells, Units, and Gear.
811.1.b.	It is functionally short for "While this card is in your hand or in your Champion Zone on your turn during an Open State, you may pay [A] to hide this facedown at a battlefield you control that doesn't already have a facedown card hidden there for as long as you control that battlefield. Beginning on the next turn, this gains [Reaction] and you may play this, ignoring its base cost."
811.1.c.	It allows the player to take the Discretionary Action Hide .
811.1.c.1.	Hide is not a subset of Play .
811.1.c.2.	Hiding a card does not open a chain.
811.1.c.3.	Playing a card from facedown (or "from Hidden") does open a chain.
811.1.d.	Some choices made while playing a card from Hidden are restricted to the battlefield where it was hidden. A card cannot be played from Hidden if it is a spell with no valid targets under

	these restrictions. See rule 355.6. Targeting for more information.
811.1.d.1.	A hidden permanent must be played to that battlefield.
811.1.d.1.a.	This includes hidden gear, and overrides the normal restriction that gear have in only being allowed to be played to base.
811.1.d.2.	If a hidden spell or a play effect of a hidden permanent chooses any targets, those targets must be chosen from among options at that battlefield, unless the ability explicitly restricts targeting in a way that makes this impossible. <i>Example:</i> Blastcone Fae is a unit with Hidden and “When you play me, give a unit -2 [M] this turn, to a minimum of 1 [M].” Because this is a play effect, its target must be chosen from among units at the same battlefield if Blastcone Fae was played from Hidden. <i>Example:</i> Tideturner is a unit with Hidden and “When you play me, you may choose a unit you control at another location. Move me to its location and it to my original location.” Because its play effect has a targeting restriction that can never be fulfilled by a unit at its battlefield, its target may be chosen freely from among the available options.
811.1.d.2.a.	Each target is treated separately and individually when processing this rule. <i>Example:</i> Smoke and Mirrors is a spell that reads in part “Choose a unit you control and another unit you control at a different location.” If Smoke and Mirrors is played from hidden, the first unit chosen can be chosen at the battlefield Smoke and Mirrors was played from, so it must be. The second unit chosen explicitly restricts targeting in a way that makes this impossible, so it can be chosen from any location.
811.1.d.3.	If a hidden spell or a play effect of a hidden permanent causes you to play a unit, you must choose to play that unit at that battlefield.
811.2.	Abilities and instructions of hidden cards other than the choices listed above function as normal. <i>Example:</i> Stand United is a spell that has Hidden and says “Buff a friendly unit. Buffs give an additional +1 might to friendly units this turn.” If it's played from Hidden, the first part of its ability must choose a friendly unit at the same battlefield, but the second part of its ability affects all friendly units with buffs, no matter where they are.
811.3.	Instead of being hidden, a card with Hidden may be played for its cost as normal, at its normal timing with no restrictions on targeting.
811.4.	Multiple instances of Hidden are redundant.
811.5.	Hidden, and whether or not a card has Hidden, is a characteristic of the card and may be checked or referenced by other Game Effects .
811.5.a.	This is independent of the state of being facedown.
811.6.	A card that is Hidden gains Reaction while facedown or played from facedown, and may be played any time a card with Reaction may be played as a result.
811.6.a.	The property is granted to the card in its facedown state, and is not publicly known.
812.	Legion
812.1.	Legion is a Dependent Keyword .
812.1.a.	It is formatted as “[Legion][>] [Text]”.

812.1.b.	Starting from the Keyword to the end of the clause, the entire statement is the Legion Ability .
812.1.b.1.	Legion is functionally short for "If you have played another card this turn, this card gains [Text]."
812.1.b.2.	The [Text] is the Dependent Ability .
812.1.c.	As long as a card different than the one with the Legion ability has been Finalized by you on the same turn then the Dependent Ability is Active on the card with Legion .
812.2.	All instances of Legion on cards a player controls are satisfied by that player playing a single card. <i>Example:</i> One card has three different Legion Abilities. The Legion Text of all three abilities will be active as long as one card has been finalized by the card's controller earlier in the same turn.
812.3.	Legion , and whether or not a card has Legion , is a characteristic of the card and may be checked or referenced by other Game Effects .
813.	Reaction
813.1.	Reaction is a Permissive keyword.
813.1.a.	It can be present on Cards, Rune Abilities, Legend Abilities and Permanent Abilities .
813.1.b.	Reaction grants the corresponding card or effect all abilities and permissions of Action .
813.1.c.	Reaction , additionally, is functionally short for the following:
813.1.c.1.	On Cards: "This can be played during Closed States on any player's turn."
813.1.c.2.	On Activated Abilities: "This can be activated during Closed States on any player's turn."
813.1.d.	Reaction is formatted as "[Reaction]" on cards, or "[Reaction][>]" on abilities.
813.2.	The corresponding card or effect with this keyword is not restricted to Closed States or Showdowns . This permission is inclusive of all other timings and options available to the ability as written, Action's permissions, or by default.
813.3.	Reaction does not alter the function of any instruction of the Card, Rune, or Effect it is on. It is <i>only</i> Permission.
813.3.a.	Playing Units with Reaction still has the inherent restrictions of playing Units without Reaction. It can only be played to the controlling player's base or a battlefield they control.
813.4.	Some passive abilities may grant a card or ability Reaction under certain conditions. The card or ability does not have the Reaction keyword unless and until those circumstances are true.
813.4.a.	Those conditions might only be fulfilled while the card or ability is on the chain. In such a case, it can still be played or activated at the appropriate timing as long as doing so <i>could</i> fulfill the conditions.
813.4.b.	If the chain item does not fulfill the conditions by the time step 5: check legality has been reached, the actions taken while playing it are undone and it is returned to the zone it was played from if it is a card.
813.5.	Reaction is a referencable characteristic.
813.5.a.	Whether or not a Game Object has Reaction is a characteristic of that Game Object and may be checked or referenced by other Game Effects .

813.5.b.	Whether or not a Spell has Reaction is a characteristic of that Spell and may be checked or referenced by other Game Effects .
813.5.c.	Whether or not an Ability has Reaction is a characteristic of that Ability and may be checked or referenced by other Game Effects .
814.	Shield
814.1.	Shield is a Passive Ability keyword.
814.1.a.	It is present on Units.
814.1.b.	Shield is formatted as "Shield [X]".
814.1.b.1.	The X is referenced in the functional text of the ability.
814.1.b.2.	The X is referred to as the Shield Value.
814.1.b.3.	If X is omitted, it is presumed to be 1.
814.1.c.	It is functionally short for "While I am a defender, I have +X [M]."
814.1.d.	Being a defender means the Unit has gained the Defender designation during Combat. <i>See rule 459. Combat for more information.</i>
814.1.d.1.	Shield remains in effect as long as the Unit maintains the Defender designation.
814.2.	If a Unit has Shield, or has been granted Shield, and is granted Shield by an additional source, the Shield Value of all granted Shield keywords is summed. <i>Example:</i> Stalwart Poro has Shield. It is chosen as the target of Block, which says "Give a unit [Shield 3] and [Tank] this turn." After Block resolves, Stalwart Poro has Shield 4 this turn.
814.3.	Shield, and whether or not a unit has Shield, is a characteristic of the Unit and may be checked or referenced by other Game Effects .
815.	Tank
815.1.	Tank is a Passive Ability keyword.
815.1.a.	It is present on Units.
815.1.b.	It is functionally short for "I must be assigned lethal damage before any other unit with the same controller as me that does not have [Tank] during the Combat Damage step."
815.1.c.	It alters how players can elect to assign combat damage during combat.
815.1.c.1.	Players must still assign lethal damage to a unit before moving to the next when assigning their damage.
815.1.c.2.	If more than one unit with Tank is present with the same controller in Combat, damage may be assigned to any of them. Units without Tank are invalid assignments until all units with Tank have lethal damage assigned to them.
815.2.	Multiple instances of Tank are redundant.
815.3.	Tank, and whether or not a unit has Tank, is a characteristic of the Unit and may be checked or referenced by other Game Effects .
816.	Temporary
816.1.	Temporary is a Triggered Ability keyword.

816.1.a.	It is present on Permanents.
816.1.b.	It is functionally short for "At the start of this permanent's controller's Beginning Phase, before scoring, kill this."
816.1.c.	The Trigger Condition is the controller of the permanent's Beginning Phase starting.
816.2.	Multiple instances of Temporary are redundant.
816.2.a.	Regardless of how many instances there are, the ability will only trigger once.
816.3.	Temporary, and whether or not a permanent has Temporary, is a characteristic of the permanent and may be checked or referenced by other Game Effects .
817.	Vision
817.1.	Vision is a Triggered Ability keyword.
817.1.a.	It is present on Permanents.
817.1.b.	It is functionally short for "When this is played, predict."
817.1.c.	The trigger is the permanent entering the Board.
817.2.	Multiple instances of Vision trigger separately.
817.2.a.	The player may choose to recycle or not recycle for each instance of Vision separately.
817.2.b.	If the player does not recycle the top card and nothing else happens in between the triggers resolving, each instance of Vision will see the same card.
817.3.	Vision, and whether or not a permanent has Vision, is a characteristic of the permanent and may be checked or referenced by other Game Effects .
818.	Equip
818.1.	Equip is an Activated Ability keyword.
818.1.a.	Equip is present on Gear with the tag Equipment .
818.1.b.	Equip has a cost to activate and Attaches the card with Equip to a chosen Unit when the cost is paid.
818.1.b.1.	Equip's choice is a Target .
818.1.b.2.	The chosen Unit will become the Top-Most Card for the Attach action.
818.1.c.	Equip is formatted as " Equip [Cost]"
818.1.c.1.	If paying costs or making choices for this ability causes triggered abilities to trigger, they will be placed on the chain above this ability in a Pending state. <i>See rule 376. Activated Abilities for more information.</i>
818.1.c.2.	Equip is functionally short for "[Cost]: Attach this gear to a unit you control."
818.1.c.3.	Equip costs may include both resource costs and non-resource costs.
818.1.c.4.	Equip abilities may also include text that alters the Equip cost. Such text is taken into account when determining a card's Equip cost when paying for the ability.
818.1.c.5.	Equip abilities may include text that alters the timing or targeting of the Equip ability.

818.2.	When the Attach action completes from this keyword, the Unit that was chosen is considered to have been Equipped by the Gear with this ability.
818.2.a.	This is an event other Game Effects and Triggered Abilities can reference.
818.3.	Equipped is the state of a Top-Most Card being Attached by one or more cards that are Equipment .
818.3.a.	The state of being Equipped is synchronous with that of the Attached state of the Equipment .
818.3.b.	A Top-Most Card is Equipped as long as one or more of its Attached cards are Equipment .
818.3.c.	The state of being Equipped corresponds to a Top-Most card having a card with Equip that is Attached to it.
818.4.	Multiple instances of Equip are equivalent to multiple Activated Abilities and can each be activated separately by paying the corresponding costs.
818.5.	Equip , and whether or not a Gear has Equip , is a characteristic of the Gear and may be checked or referenced by other Game Effects .
818.5.a.	Whether or not a Gear has Equip may be referenced even if the Rules Text of the Gear is Inactive . <i>See rule 716. Attachment for more information.</i>
819.	Quick-Draw
819.1.	Quick-Draw is a Triggered Ability keyword. It is also a Permissive keyword.
819.1.a.	Quick-Draw is present on Gear with Equip abilities.
819.1.b.	Cards with Quick-Draw have Reaction inherently.
819.1.c.	Quick-Draw allows cards to be played and Attached using Reaction timing.
819.1.d.	Quick-Draw is functionally short for “[Reaction]” and “When you play this, attach it to a Unit you control.” <i>See rule 716. Attachment for more information.</i>
819.2.	Multiple instances of Quick-Draw do not trigger separately and have no effect beyond the first.
819.3.	Quick-Draw , and whether or not a gear has Quick-Draw , is a characteristic of the Gear and may be checked or referenced by other Game Effects .
820.	Repeat
820.1.	Repeat is an Optional Additional Cost keyword.
820.1.a.	Repeat is present on Spells and Abilities .
820.1.b.	Repeat is an optional cost that a player may pay to execute the effect of their spells and abilities a second time.
820.1.c.	Repeat is formatted as “ Repeat [Cost]”
820.1.c.1.	The Cost is an Additional Cost to be paid during the steps of playing the spell or ability.
820.1.c.2.	If a spell or ability has more than one instance of Repeat , each Cost may be paid or not paid individually.
820.1.c.3.	Each Repeat Cost can be paid only a single time.

820.1.d.	Repeat is functionally short for “You may pay [Cost] as an additional cost as you play this. If you do, execute the instructions of this chain item one additional time during resolution.”
820.1.d.1.	When the additional cost is paid, the effect of the spell or ability, upon resolution, will be performed an additional time. <i>Example: Desert’s Call is a spell with [Repeat] [2] and “Play a 2 [M] Sand Soldier unit token.” If its controller pays its Repeat cost as they play it, the card’s instruction to play a Sand Soldier is executed twice, as though the card says “Play a 2 [M] Sand Soldier unit token. Play a 2 [M] Sand Soldier unit token.”</i> <i>Example: A unit reads in part “When I attack or defend, you may deal damage equal to my Might to an enemy unit here,” and “My abilities have [Repeat] — Discard 1.” When its ability triggers, if its controller pays the Repeat cost as they play it, the ability’s instruction to deal damage equal to the unit’s Might is executed twice, as though the ability says “Deal damage equal to my Might to an enemy unit here. Deal damage equal to my Might to an enemy unit here.”</i>
820.1.d.2.	Any instructions not performed on resolution of the spell or ability are ignored.
820.2.	When a spell or ability’s effect is performed an additional time with Repeat, choices must be made at the usual time during the Make Relevant Choices step of Playing a Card. <i>See rule 349. Playing Cards for more information.</i>
820.2.a.	Choices made for the additional execution do not have to be the same as the choices made for the initial execution. <i>Example: Rocket Barrage is a spell with [Repeat] [4][C] and “Choose one — Deal 4 to a unit in a base. [or] Kill a gear.” If Rocket Barrage’s controller pays its Repeat cost as they play it, they may choose the same mode or a different one, and if they choose the same mode, may choose the same target or a different one. If they choose “Kill a gear” twice and choose two different gear, they must specify which gear is the first target and which is the second. As the spell resolves, those two gear will be killed in the chosen order.</i>
820.3.	Multiple instances of Repeat can be paid for separately. The spell or ability’s instructions will be executed an additional time on resolution for each instance of Repeat that is paid for.
820.3.a.	Regardless of the number of times a spell or ability’s instructions are executed with this keyword, it is only Played once.
820.4.	Repeat , and whether or not a spell or ability has Repeat , is a characteristic of the spell or ability and may be checked or referenced by other Game Effects .
821.	Weaponmaster
821.1.	Weaponmaster is a Triggered Ability keyword.
821.1.a.	Weaponmaster is present on Units .
821.1.b.	Weaponmaster is a Play Effect that chooses an Equipment you control and allows you to pay its Equip cost at a discount, regardless of the usual timing of the Equip ability, to Attach that Equipment to the unit with Weaponmaster .
821.1.c.	Weaponmaster is functionally short for: “When you play me, you may choose a Card you control with the Equipment tag. Necessary portions of its Rules Text are no longer Inactive if they are currently Inactive. Pay the cost of its Equip ability, reduced by [A], to attach it to this unit.” <i>See rule 716. Attachment for more information.</i>

821.1.c.1.	Weaponmaster can choose an Equipment whether it has an Equip ability or not.
821.1.c.2.	The cost of the Equip ability is determined as though that Equip ability was being activated choosing the unit with the Weaponmaster ability, as modulated by any abilities that alter Equip costs.
821.1.c.3.	If the chosen card's Equip cost does not contain [A], it can still be paid, but will not be reduced.
821.1.c.4.	If the chosen card doesn't have an Equip cost, it can't be paid.
821.1.c.5.	If the chosen card's Equip cost can't be paid, if it can't be detached from its current Top-Most card, or if it can't be attached to the unit with the Weaponmaster ability, it stays in its current location, Attached to anything it was already Attached to.
821.1.c.6.	The Equip ability is not activated this way, and the unit with the Weaponmaster ability is not chosen.
821.1.c.7.	Multiple instances of Weaponmaster trigger separately, and can choose different targets.
821.1.d.	If you choose the same target with multiple instances of Weaponmaster , each will resolve separately.
821.2.	Weaponmaster has no function while on the board.
821.3.	Weaponmaster , and whether or not a unit has Weaponmaster , is a characteristic of the Unit and may be checked or referenced by other Game Effects .
822.	Ambush
822.1.	Ambush is a Passive Ability keyword.
822.1.a.	It is normally present on Units .
822.1.b.	It is functionally short for "I may be played to a battlefield where you control Units " and "I have [Reaction] as long as I'm being played to a battlefield where you control Units ."
822.1.c.	It is a passive ability that adds options to locations that are valid for a Unit to be played to during the Make Relevant Choices step of Playing a Card <i>See rule 349. Playing Cards for more information</i>
822.1.d.	Ambush can also appear as a verb on a card. In such a case, the verb is taken to mean "play with the permissions of the Ambush keyword." <i>Example:</i> Rengar, Trophy Hunter reads in part "I can [Ambush] to a battlefield where there are enemy units, even if you don't have units there." This ability expands the normal permissions of the Ambush keyword to include battlefields where there are enemy units. <i>Example:</i> A card reads in part "Opponents can only [Ambush] at any time they could play cards with [Action] ." This ability introduces a restriction to when opponents can play cards with Ambush .
822.2.	Multiple instances of Ambush are redundant.
822.3.	If there are no units at the location chosen before Finalization completes for any reason, then it is no longer a valid location by Ambush 's reasoning and cannot be played there
822.3.a.	Other effects and permissions may still enable this Unit to be able to be played to the selected location, but Ambush's permission will not be valid
822.4.	Ambush , and whether or not a unit has Ambush , is a characteristic of the Unit and may be checked or referenced by other Game Effects .

823.	Hunt
823.1.	Hunt is a Triggered Ability keyword.
823.1.a.	Hunt is present on Units .
823.1.b.	Hunt is both a Conquer and a Hold effect.
823.1.c.	Hunt is formatted as “ Hunt X”
823.1.c.1.	Hunt is functionally short for: “When I Conquer or Hold , my controller gains X XP.” See rule 728. XP for more information
823.1.c.2.	If X is omitted, it is presumed to be 1.
823.1.c.3.	X is referred to as the Hunt Value.
823.2.	If a Unit has Hunt , or has been granted Hunt , and is granted Hunt by an additional source, the Hunt Value of all granted Hunt keywords is summed.
823.3.	Hunt , and whether or not a unit has Hunt , is a characteristic of the Unit and may be checked or referenced by other Game Effects .
824.	Level
824.1.	Level is a Dependent Keyword .
824.1.a.	It is formatted as “[Level [N]>] [Text]”.
824.1.b.	Starting from the Keyword to the end of the clause, the entire statement is the Level Ability .
824.1.b.1.	It is functionally short for “While you have [N] or more XP, this card gains ‘[Text]’.”
824.1.b.2.	The [Text] here is the Dependent Ability
824.1.c.	As long as the controlling player has [N] XP, then the Dependent Ability will be be Active on the card with Level
824.1.c.1.	If the controller of the card with Level changes, then the Dependent Ability will be rendered Active or Inactive based on the new controller's XP.
824.1.d.	The Dependent Ability will be Inactive as soon as the controlling player has less than [N] XP.
824.2.	Level , and whether or not a card has Level is a characteristic of the card and may be checked or referenced by other Game Effects .
825.	Unique
825.1.	Unique is a Deck Constraint Permission .
825.2.	It is normally present on main deck cards.
825.3.	Unique is not functionally short for any rules text, and instead provides a restriction to players during Deck Construction.
825.3.a.	A deck can contain only one card of a given name if the card has Unique
825.3.b.	If a card is a Signature card and is also Unique , then that deck can contain any combination of three Signature cards, but still only one of each named Unique card.
825.4.	Cards with Unique have no additional effects during gameplay.

825.5.	Unique , and whether or not a Card has Unique , is a characteristic of the Unit and may be checked or referenced by other Game Effects .
826.	Backline
826.1.	Backline is a Passive Ability keyword.
826.2.	It is present on Units.
826.3.	It is functionally short for "I must be assigned lethal damage after any other unit with the same controller as me that does not have [Backline] during the Combat Damage step."
826.4.	It alters how players can elect to assign combat damage during combat.
826.4.a.	Players must still assign lethal damage to a unit before moving to the next when assigning their damage.
826.4.b.	If more than one unit with Backline is present with the same controller in Combat, damage may be assigned to any of them. Units with Backline are invalid assignments until all units without Backline have lethal damage assigned to them.
826.5.	Multiple Instances of Backline are redundant.
826.6.	Backline, and whether or not a unit has Backline, is a characteristic of the Unit and may be checked or referenced by other Game Effects .
827.	Empower
827.1.	Empower is an Activated Ability keyword.
827.1.a.	Empower is normally present on permanents and legends.
827.1.b.	Empower has a cost to activate and Empowers the source of the ability when the cost is paid. <i>See rule 441. Empower (Game Action) for more information.</i>
827.1.b.1.	The source game object is not a target of the Empower ability.
827.1.c.	Empower is formatted as " Empower [Cost]"
827.1.c.1.	Empower is functionally short for "[Cost]: Empower this. Play only if not Empowered."
827.1.c.2.	Empower costs may include both resource costs and non-resource costs.
827.1.c.3.	Empower abilities may also include text that alters the Empower cost. Such text is taken into account when determining a card's Empower cost for any reason.
827.1.c.4.	Empower abilities may include text that alters the timing of the Empower ability.
827.2.	When the Empower action completes from this keyword, the source permanent or legend becomes Empowered .
827.2.a.	This is an event other Game Effects and Triggered Abilities can reference.
827.3.	Multiple instances of Empower are equivalent to multiple activated abilities and can each be activated separately by paying the corresponding costs.
827.4.	Empower and whether a permanent or legend has Empower are a characteristic of those Game Objects and may be checked or referenced by other Game Effects .
828.	Empowered

828.1.	Empowered is a Dependent Keyword .
828.1.a.	It is formatted as “[Empowered][>] [Text].”
828.1.b.	Starting from the keyword to the end of the clause, the entire statement is the Empowered Ability .
828.1.b.1.	It is functionally short for “While I have the Empowered status, this card gains '[Text]'.”
828.1.b.2.	The [Text] here is the Dependent Ability .
828.1.c.	As long as the Game Object has the Empowered status, then the Dependent Ability will be active.
828.1.d.	If the Dependent Ability is a Triggered Ability whose condition is “When I become Empowered,” or a permutation thereof, it will be active and trigger when its source becomes Empowered .
828.2.	Empowered and whether or not a card has an Empowered Ability is a characteristic of the card that may be checked or referenced by other Game Effects .
829.	Flow
829.1.	Flow is a passive ability keyword.
829.1.a.	Flow is present on Spells .
829.1.b.	It is functionally short for “You may play this from your trash for its flow cost. Then banish it.”
829.1.b.1.	Banishing the spell in this way is a delayed replacement effect. If the spell would leave the chain after becoming a finalized chain item, and leaving the chain wasn't instructed by its own execution, banish it instead. <i>See rule 367. Replacement Effects for more information.</i> <i>See rule 389. Delayed Abilities for more information.</i>
829.1.b.2.	Playing a spell for its Flow cost does not change the timing at which it can be played, nor any permissions for the spell aside from the zone from which it can be played.
829.1.c.	Flow is formatted as “ Flow [Cost]”
829.1.c.1.	The cost is an alternate cost that replaces the base cost of the spell to be paid during finalization.
829.1.c.2.	Flow costs may include both resource costs and non-resource costs.
829.1.c.3.	If a spell has multiple instances of the Flow keyword with different costs, its controller may choose which cost to apply as they play it.
829.2.	Flow , and whether or not a spell has Flow , is a characteristic of the Spell and may be checked or referenced by other Game Effects .
